

CYCLONE IN TEXAS.

Fully Fifty People Killed in One Town.

ONE HUNDRED OTHERS INJURED.

It is believed that one-fourth of them will die—in addition to these many are missing and the most of them are probably dead—full particulars are unobtainable.

SHERMAN, Tex., May 16.—Just a few minutes before 5 o'clock yesterday afternoon a cyclone, not exceeding two blocks in width, but carrying widespread destruction and death in its wake, swept through the western half of the city, traveling almost directly north. The extent of the disaster is as yet unknown, but it is as likely that as many as 50 people are dead, and the number of persons wounded will reach not less than 100. It will be several days before the exact number of fatalities can be given, as many persons, and especially children, are missing, and many of the injured are in such critical shape that a score may die.

The list of killed as far as reported by the authorities is as follows:

Mrs. Otto Baldinger and three children.
Mrs. I. L. Burns and two children, Johnnie, aged 3, and Grover, aged 10.
John Ames and wife and two children, Susie and Mamie.
Rev. J. S. Shearer.
Mrs. Lake Montgomery and two children; another is also missing.
William Halton, farmer.
Mrs. George Anderson, an infant daughter.

Mary Belle Jenkins.
Charles Weddle of Fairview.
D. L. Pierce and son Tom, aged 14.
Mrs. Dave Herring and two small children.
John Taylor.
Mrs. Burles.

T. W. Jenkins, wife and 5-year-old daughter.

An unknown lady and two little white children, about 4 and 6 years of age, have not yet been identified and are being held in the morgue for identification.

The list of colored people killed so far as learned is as follows:

James Walker.
Mrs. Nora Nicholson and two children.
Lucy Ballinger and daughter.
Charley Cox, son of Eliza Cox.
Mary Lake and three children, Letitia, John and Fatus.

Jim English.
Katie King.

An incomplete list of the wounded is as follows:

Tom Jenkins, wife and five children.
Mr. and Mrs. Henry Miller and two children.
A heavy siver of wood was driven through the thigh of Granville Jenkins. Mr. and Mrs. Ed Halsell and a little son, with B. F. Woodward, were in the cellar at the former's residence, and were covered with debris. Mr. and Mrs. Halsell, both painfully bruised about the thighs.

Eliza Cox, colored, hurt in the breast.
Harriet Lake, colored, cut and bruised about the head.

Ben Cephus, colored, his wife and son Clarence, all have limbs broken and are in precarious conditions.

Lettie and Lummie Burns are badly hurt.

Mrs. and Mr. Jessie Brown, badly bruised. Mrs. Brown's arm broken.
Ike Shearer, son of Rev. Shearer, who was killed, is badly bruised.

Mrs. J. B. King and two children are seriously injured.

Phillip Nichols received painful cuts about the head.

Mrs. John Irving and four children, all more or less injured.

W. S. Bostwick, who was in the same residence, is cut very seriously.

Otto Ballinger, whose family were all killed, is badly hurt about the head.

Hester and Nannie Nicholson, colored, of the family of which six were killed, are seriously and internally hurt.

Dave Herring and Mrs. D. L. Pierce, who alone escaped death at their home, are perhaps fatally hurt.

Mary Patrick, colored, and three children, all badly hurt internally.

Mattie Johnson, colored, head hurt and injured internally; will not live.

John and Alice Nowhouse, colored, and four children, badly hurt.

Harriet Hendricks, colored, both legs broken.

Miss Eva Pierce, daughter of D. L. Pierce, left leg and right arm broken.

Mr. and Mrs. Wright Clark, painfully hurt.

The family of John Hamilton have been discovered, all badly injured. One of the Hamilton boys, aged 20 years, will die. Two girls, one aged 15 and one 9, were fatally injured.

It is impossible to get a correct list of all the missing. Nearly every family in the district has some member that they can not account for and it is believed that most of the missing are dead. It is very conservative to estimate that the list of fatalities will reach 50, while the injured will reach 100. Every moment brings new victims, many of them horribly mangled.

At least 50 houses are totally wrecked. Most of them are small cottages except in Fairview and Washington avenues, where the handsome residence of L. F. Ely, Captain J. C. Stalter, Mrs. Pat Mattingly and James Falls also succumbed. The loss will reach at least \$150,000, and but little if any of it was covered by cyclone insurance.

The greatest number of fatalities are reported from the colored settlement along Post Oak and Lincoln streets, between Cherry and Lost streets, where several people were killed outright.

Very few of the persons in the demolished houses are able to tell just how the storm burst upon them, and only in one or two instances were parties able to get out of its deadly path.

About the most graphic description given by any of the injured was that of W. S. Bostwick, who said:

"I was at Mr. John Irvine's house when I heard the noise of the approaching storm. Just as I looked out I saw Captain Berge's house blown into the air and then Mr. Shearer's house. The air was filled with great trees and timbers and every conceivable kind of article. I was fascinated, petrified, for it was coming directly upon us and that it could not be long in reaching us. It was a black serpentine cloud, twisting, writhing in the center, but at the bottom it seemed to be moving steadily.

"I woke up from my stupor and called out to the family who were in the house and asked them not to run out. I feared that we would all be struck by flying timbers. Then came an awful crash, a sense of suffocation and when it was over the house was gone and myself and my family were scattered about the yard and under the debris. It was over in such a short time I can not give you an idea of how long it was."

A great many of the wounded are in private houses, scattered all over the city. It is safe to assume that at least one-fourth of the number of injured will die in the next 24 hours.

Another storm of a similar nature passed about six miles west of the city at about the same hour. Several houses were blown down and many persons injured. Their names can not be obtained.

Reports are that the storm killed many persons in the county west of Howe.

At Carpenter's Bluff, on Red river, it is reported that six persons were hurt, five seriously.

Destruction Done at Howe.

HOWE, Tex., May 16.—Yesterday's terrible cyclone struck this town leaving death and ruin in its wake. The path of the cyclone at this point was a quarter of a mile wide. Ten farm houses and as many barns were wrecked. Eight persons were killed outright and many injured. Bark was ripped from trees and much stock was killed.

Four Killed and Five Injured.

DENTON, Tex., May 16.—A cyclone struck the town of Gribble Springs, eight miles north of this city, yesterday afternoon. Four persons were killed and five others so badly wounded they can not live. The property damage is great. Particulars are yet unobtainable.

Four Persons Injured.

CARPENTER BLUFF, Tex., May 16.—A cyclone struck this place yesterday afternoon. The dwelling of John Devant was blown down and four persons—Devant and wife and Devant's hired man, named Armour, and a little child, received injuries from which they will die.

One Killed and Seventeen Injured.

JUSTIN, Tex., May 16.—A cyclone struck the town of Justin yesterday at 2:20 p. m., blowing 12 houses down, killing one man named W. J. Evans of Keller, Tex., and badly injuring 17 others. The cyclone also did much damage north of here.

AN IMPORTANT DECISION.

Hold-Over Republican Senators in Indiana Knocked Out.

INDIANAPOLIS, May 16.—The supreme court has reversed the decision of the superior court in the legislative apportionment act.

Justice McCabe, in concluding the ruling opinion, says: "Our conclusion is that the act of 1885 is the only law that has not been repealed or adjudged unconstitutional under which an election of members to the legislature can be held in November, 1896; that the apellee has no right to invoke the powers of the courts to declare it unconstitutional; that, therefore, the complainant did not state facts sufficient to constitute a cause of action, and that the superior court erred in overruling the motion thereto. The judgment is reversed with instructions to sustain the demurrer to the complaint."

There is a dissenting opinion by Judge Monks and a separate concurring opinion by Judge Jordan, who holds that the judgment should be reversed and the lower court directed to sustain the demurrer to the complaint for want of equity.

The effect of the decision is to declare vacant the seats of the Republican hold-over senators. It also makes invalid in one sense the acts of the late legislature. Courts have held, however, that as such a legislature is accepted at the time of its existence as the representative of the people, its statutes can not be wiped from the books.

DUPONT NOT SENATOR

He Can Not Represent the State of Delaware.

THE SENATE HAS SO DECIDED.

The Vote a Very Close One, Senator Stewart Casting the Deciding Vote—Several Inquiries Ordered—The House Passes Over a Hundred Pension Bills in Opposition of Two of Its Members.

WASHINGTON, May 16.—By a vote of 31 to 30 the senate determined yesterday that Henry A. Dupont was not entitled to a seat in the senate from the state of Delaware. This closed a long and animated controversy which had become one of the most notable contests of its kind in the history of the senate. The result was in doubt up to the last moment and this lent added interest to the final vote. There had been some question as to the direction of Mr. Stewart's vote, but it went with those of the Democrats and Populists, and was the decisive vote in declaring that Mr. Dupont was not entitled to a seat.

HENRY A. DUPONT.

Before taking the vote Mr. Platt (Rep., Conn.) spoke for Mr. Dupont, and Mr. Vilas (Dem., Wis.) against.

Earlier in the day Mr. Bacon (Dem., Ga.) spoke against the issue of bonds without authority of congress. A resolution was agreed to for an inquiry by the finance committee relative to the competition of oriental products with those of this country. Resolutions were proposed by Mr. Morgan of Alabama for an inquiry as to our treaty rights with Spain, and by Mr. Gallinger of New Hampshire, relating to the need of additional tariff arrangements.

House Proceedings.

WASHINGTON, May 16.—The house occupied itself in passing the private pension bills which were favorably noted upon during the two special days given to their consideration. Mr. Erdman (Dem., Pa.) and Mr. Talbert (Dem., S. C.) threw such obstacles in the way of the bill as they could. Thirty-four were held up because they were not engrossed, but 100 were passed, leaving about 60 yet undisposed of.

At the opening of the session Mr. Howard (Pop., Ala.) rose to a question of privilege to denounce as fabrications some newspaper reports printed five months ago to the effect that he had entered the hall of the house in an intoxicated condition and had been carried out by two colored porters.

The Hoge-Otey election case from the Sixth Virginia district was unanimously decided in favor of Mr. Otey, Democrat, the sitting member.

The entire evening session of the house was spent in a futile effort to obtain a quorum, which was made necessary on a point of order raised by Mr. Talbert (Dem., S. C.) at the beginning of the session. Mr. Talbert first asked for unanimous consent to proceed with the consideration of pension bills only and that all bills relating to desertion for the correction of military records go to the foot of the calendar. A call of the house was ordered which showed the presence of 166 members, 13 fewer than a quorum.

The house adjourned until Monday.

DRAIN ON THE GOLD.

Speculators Endeavoring to Force Another Bond Issue.

WASHINGTON, May 16.—Treasury officials are the authority for the rumors that the drain on the gold reserve has begun. It is scarcely a rumor any longer; the daily withdrawals point to a resumption of the methods that were put into play last year, when the speculators brought about a condition that forced an issue of bonds and compelled the administration—owing to its unwillingness to pay out the silver in the vaults—to sell its bonds to bidders that were not always the highest for the purpose of gathering in the necessary funds to carry on the government and meet the ordinary expenditures.

Gold is beginning to go out. It is believed that soon arrangements will be made for another bond issue, or President Cleveland will send a special message to congress.

A Call on the Banks.

WASHINGTON, May 16.—The treasury department has issued further call on the depository banks graded according to the amount of their holdings of government money. The call is a general one on all the depository banks for 50 per cent of the holdings of

government money to be paid on or before June 1.

A rough estimate of the amount held by the depository banks is between \$8,500,000 and \$9,000,000, and the draft on the money market will accordingly be for that sum. It is stated that no important change in money rates is likely to result at the moment from the call, owing to the large continued receipts of funds from the interior and heavy amounts of foreign capital that are offering in this market.

Over a Million a Day.

WASHINGTON, May 16.—The treasury yesterday lost \$1,107,700 in gold coin, \$15,300 in bars, which leaves the true amount of the gold reserve \$113,141,463. Of the gold withdrawn \$1,000,000 was for export.

DRAWBACKS TO TRADE.

Presidential Contest and the Uncertainty of the Yield of Crops.

NEW YORK, May 16.—R. G. Dun & Company's weekly review of trade says: It is now the middle of May, too late for business to change materially until the prospects of coming crops are assured, and definite shape has been given to the presidential contest by the conventions. Until the future is more clear there is a prudent disinclination to produce much beyond orders, or to order beyond immediate and certain needs. If this waiting spirit prevails two months longer it will crowd into the last half of the year an enormous business, if the outlook then is good. For the present there is less business on the whole than a year ago, though in some branches more, and the delay following months of depression is to many trying, and causes numerous failures.

An attempt was made to manufacture excitement in cotton out of the government report, but the price closed exactly as it began the week, and the port receipts have been actually larger than last year. All current arguments based on the assumption that the quantity used in manufacture has been or is now at a maximum rate are disapproved by the closing of many mills for want of demand, and the general effort to reduce wages, which has caused some strikes.

Wheat is unchanged in spite of all rumors, and the Atlantic exports, flour included, which were last year greater than western receipts, for two weeks 3,059,484 bushels, against 2,917,305 received, have this year been only half as large; 1,006,414 bushels exported, against 4,079,239 western receipts.

The most fortunate of the chief industries at present is the boot and shoe manufacture, which is not only shipping to customers within 6 per cent of the largest number of cases ever forwarded in the first half of May, but is getting many new orders, and there are many urgent requests to anticipate orders for June and July delivery, indicating that distribution to consumers has much outrun expectations.

The iron and steel industry, on the other hand, is pronounced as dull as it ever has been in its whole history at Pittsburgh, in part because of doubt about the maintenance of prices recently advanced, and the demand is so small that in spite of such advances prices average 1.2 per cent lower for the week, Bessemer pig being no higher than it was three months ago at \$12.60, while No. 1 anthracite is also lower, \$12.50 at New York. The attempt to hold common bar iron at 1.2 cents leads many consumers to prefer steel bars, which sell at 1.1 cents, and prices of nails are expected to be reduced because of scanty demand. There is much promise for future structural work, but orders are deferred.

Sales of wool have been a little larger the past week, 3,543,200 pounds at the three chief markets, but for two weeks only 6,539,200 pounds, against over 11,000,000 pounds last year, and in 1892.

The large drives in clothing have cleared out stocks of some ready-made concerns, but checks new business, and the general disposition is to postpone orders as far as possible.

Failures for the week have been 224 in the United States, against 221 last year, and 33 in Canada, against 37 last year.

WARNED IN TIME.

Train Robbers Felled by Having Their Signals Ignored.

HEXINGTON, W. Va., May 16.—At Nolan, on the Norfolk and Western railroad, a band of robbers looted several stores.

Shortly before midnight a freight train stopped at the tank for water, and the crew was notified that the band, who were waiting there, had a plan to rob the northbound passenger and express train.

A message was therefore sent to Williamson notifying the express train not to stop at the Nolan tank for water.

The express train crew armed themselves and went by Nolan tank at the rate of 50 miles an hour. A crowd of 15 armed men lined each side of the track, and tried to flag the train down. The crowd of robbers then retreated to the mountains and made their escape.

Not by Courtmartial.

HAVANA, May 16.—It is announced on authority that two Americans captured in Pinar del Rio as alleged fugitives from the filibuster Competitor will not be tried by courtmartial. General Weyler ordered an investigation into their case prior to receiving any representations from Consul General Williams.

Twins Dead, Mother Dying.

SPRINGFIELD, O., May 16.—The twins of Mrs. Patrick Tehan, living south of town, have both died, and the mother is not expected to live.

BALLOT FOR BISHOP.

The Important Matter Before the Methodist Conference.

MUCH INTEREST IN THE CONTEST

Three Ballots Taken but No One Near an Election—Chaplain McCabe Said to Be Leading, While Dr. Earl Cranston Is a Close Second—Other Proceedings of the General M. E. Conference.

CLEVELAND, May 16.—Interest in the M. E. conference yesterday was centered in the election of bishops. Central armory was filled with spectators. Bishop Fitzgerald presided and the devotional services were conducted by the Rev. J. M. Shampert of Mississippi, a colored minister. Promptly at 9 o'clock Dr. Swindell arose and moved that the order of the day, election of bishops, be taken up. Bishop Foss offered a most fervent prayer for Divine guidance and freedom from any unworthy motive.

The floor was cleared of all except delegates and a ballot for bishop was taken. Two-thirds of all the votes cast were necessary to election.

While the various ballots were being counted the regular business was taken up. A resolution by Dr. Ackerman against any delegate leaving before the end of the conference was tabled amid applause.

Dr. J. N. Fradenburgh of Erie conference presented a resolution which recites the fact that as doubt exists regarding the constitutionality of the restrictions of popular amusements, the committee on judiciary should be requested to present a report on that point. The resolution was adopted.

Rev. Dr. William Wiandells of Pennsylvania introduced a resolution asking the United States government to refuse permits to sell liquors in any building owned or controlled by the government. Adopted.

Memorial services were held. Bishop Bowman, the senior bishop, was asked to preside. After devotional exercises Bishop Bowman said:

"These memorial services are held for five officers, which were appointed by the last general conference. Many thousands of our brothers have gone since the last conference, but these five members, by reason of their official position, are nearer to all of us than the others."

Rev. Dr. W. F. Whitlock of Delaware read a memorial on the life of Rev. Dr. J. W. Mendenhall, who was editor of The Methodist Review.

By this time the ballots for bishop had been counted. It was announced as follows:

The whole number of votes cast, 521; necessary to a choice, 348. At least 50 candidates received votes. J. W. Hamilton received 107; Earl Cranston, 116; C. C. McCabe, 141; J. W. E. Bowen (colored), 147.

The result of the vote was received with great applause.

Another ballot was taken. Its result was announced after two hours spent in counting. It resulted in no choice. McCabe led and Bowen fell somewhat behind. Following is the vote on the first five names: C. C. McCabe, 218; J. W. E. Bowen, 175; Earl Cranston, 164; J. W. Hamilton, 145; Dr. Eutz, 96. Necessary to a choice, 343.

As there was no election, another ballot was taken, and the tellers retired to count the vote. A motion was made to adjourn and receive the vote in the morning, but Dr. Backley said it would be impossible to keep the vote a secret.

Rev. Dr. Leonard said it was disgraceful that the tellers could not be trusted to do their duty. They had been tested, and the conference must place confidence in them.

The conference then adjourned.

A delegate who said he received his information direct from one of the tellers gave the following figures to the Associated Press representative as the result of the third ballot: Chaplain McCabe, 234; Rev. Dr. Earl Cranston, 203; Rev. Dr. J. W. E. Bowen, 170; Rev. Dr. J. W. Hamilton, 153; Rev. Dr. H. A. Buttz, 113. This same delegate advanced the opinion that McCabe and Bowen had reached the limit of their strength and that there was a great deal of quiet talk among the more conservative members of the conference of transferring their support to Dr. Buttz, a very quiet, dignified and scholarly man.

There was a lively debate bordering on the acrimonious at the meeting of the committee on state of the church in the afternoon. A report upon sociological work, written by Rev. Dr. William A. Quayl of St. Louis, was presented, to be the voice of the church on the subject. It was long and a wide departure from the usual formal report. It called forth some decided criticism and was defended by Mr. Quayl. After a long discussion it was returned to the subcommittee for revision. The committee took up the suggestion that the term of probation be shortened, but the committee decided in favor of retaining the present term of six months. A subcommittee was instructed to prepare a ritual form to be used in the admission of probations to full church membership.

The committee on itinerary considered another measure calculated to lessen the authority of the bishops. It was that the consent of the cabinet of presiding elders be held before a bishop can transfer a minister from one conference to another. The committee declined to recommend the change.

In the armory in the evening an anniversary occasion was celebrated in honor of the Epworth league.

CHAPTER II.

Agricola no doubt made the Roman yoke easier upon the necks of the conquered people and suggested the rotation of crops. He also invaded Caledonia and captured quite a number of Scotchmen, whom he took home and domesticated. Afterward, in 121 A. D., the Emperor Hadrian was compelled to build a wall to keep out the still unconquered Caledonians. This is called the "Picts' wall," and a portion of it still exists. Later, in 208 A. D., Severus built a solid wall of stone along this line, and for 70 years there was peace between the two nations.

Toward the end of the third century Carausius, who was appointed to the thankless task of destroying the Saxon pirates, shook off his allegiance to the Emperor Diocletian, joined the pirates and turned out Diocletian, usurping the business management of Britain for some years. But, alas! he was soon assassinated by one of his own officers before he could call for help, and the as-

The Scots also made turbulent times by harassing Constantine and seeking to introduce their ultra religious belief at the muzzle of the crossgun.

Trouble now came in the latter part of the fourth century A. D., caused by the return of the regular Roman army, which went back to Rome to defend the imperial city from the Goths who sought to "stabilize their stock in the palace of the Caesars," as the historian so tersely puts it.

In 418 A. D. the Roman forces came up to London for the summer and repelled the Scots and Picts, but soon returned to Rome, leaving the provincial people of London with disdain. Many of the Roman officers while in Britain had their clothes made in Rome, and some even had their linen returned every 30 days and washed in the Tiber.

In 446 A. D. the Britons were extremely unhappy. "The barbarians throw us into the sea, and the sea returns us to the barbarians," they ejaculated in their petition to the conquering Romans. But the latter were too busy fighting the Huns to send troops, and in desperation the Britons formed an

LANDING OF HENGIST AND Horsa.
alliance with Hengist and Horsa, two Saxon traveling men, who in 449 A. D. landed on the island of Thanet, and

malignant alcoholism and trichinosis. Many a Saxon would have filled a drunkard's grave, but wobbled so in his gait that he walked past it and missed it.

To drink from the skulls of their dead enemies was a part of their religion, and there were no heretics among them.

Christianity was introduced into Britain during the second century, and later, under Diocletian, the Christians were greatly persecuted. Christianity did not come from Rome, it is said, but from Gaul. Among the martyrs in those early days was St. Alban, who had been converted by a fugitive priest. The story of his life and death is familiar.

The Bible had been translated, and in 814 A. D. Britain had three bishops—viz. of London, Lincoln and York.

BULL NYE.

A FOLDING SCREEN.

Directions For Making One at Home in
Half a Day at Small Expense.

A writer in The Decorator and Furnisher gives the assurance that with one morning's work any one can manufacture a light and durable folding screen at a very small cost. Here are the directions given: Have made by a carpenter a frame of any desired height and width. Three panels, each panel 62 by 22 inches, make a desirable size for a bedroom screen, and four panels 6 feet high and 2 feet wide a good size for hall or dining room. The panels are to be joined together with hinges and finished off neatly at the top, and, if desired, rollers can be added to the bottom. The rest of the work can be easily done at home. Get some unbleached muslin, free from knots—the number of yards can be easily calculated—and soak over night in hot water to shrink it. Allow it to become nearly dry, and then nail it with small tacks over each panel, pulling it very tight so as to form a smooth surface as possible. When this is done, get about 5 cents' worth of common white sizing; cut up and melt in an earthenware jar with a very little water. When melted, brush over the entire surface of the cloth thinly and evenly with a paint brush—the larger the better, as it should be done quickly while the sizing is hot. As soon as dry it is ready for the paper to go on.

If the screen is for a bedroom and not very large, select a cheerful, bright pattern of paper—a small design of rambling flowers or vines would be best, the colors in harmony with the rest of the room, while, if intended for a dining room or hall, any paper that would suit the walls of these would suit a screen. To paper it fold the screen flat and lay on a large table. Cut the paper the length required, and spread over smoothly with flour paste. Get some one to take the other end, so as to hold the paper by each corner, turn over and lay evenly and smoothly on the panel. Press on with a clean cloth, and trim off to fit the panel exactly. Cover each panel on both sides in the same way. Be sure to select paper with bordering, as it gives a much handsomer finish to the screen than without.

A Clothespin Apron.

Among purely useful affairs that housekeepers prize is the clothespin apron. It is a great convenience to have something at hand for holding the clothespins instead of tossing them into the basket with the clean clothes and then picking them out again at ironing time.

Make it of bedticking or awning cloth. Cut the back 15 inches square, or larger if required, and the front enough shorter to form pockets. Bind the top of the front with wide red or blue cotton tape, and bind the pieces together around CLOTHESPIN APRON. the edges; then bind back pieces across top, leaving ends of the tape for tying about the waist. It should be tied loosely, just enough to confine it, as there is no fullness, and it is not intended to fit in to the form at the waist. Sew two large dress rings at the two upper corners for hanging it to two hooks when not in use. The clothespins are to be kept in it, and if hung in the laundry near the tubs it will always be in readiness for use, says The Household, which furnished the illustrated description.

Belt Buckles and Cuff Buttons.

A new idea for belt buckles and cuff buttons has been evolved which is likely to make them as attractive as they are indispensable, says a New York writer. The reign of the shirt waists, instead of being over, is only begun, and they furnish such excellent opportunity for displaying buckles and buttons that the latter have become a more important accessory of a woman's summer apparel than ever.

The scheme is to use the coats of arms or flags of the different nations, the emblems armorial or escutcheons of one family or the insignia of the army or navy for designs. For girls who incline to uniforms and their wearers there are sets of light artillery, with mounted cannon for buckles and innocent looking cannon balls for buttons. Crossed sabers and stacked rifles also come under the army designs. So a girl may go forth armed and equipped for conquest of any kind, and can look like an animated arsenal if she sees fit.

Homemade Yeast.

Boil 6 good sized potatoes in a quart of water and mash them through a colander; steep a handful of hops in a quart of water and pour all the water over the potatoes; add a teaspoonful of sugar and a teaspoonful of coarse salt. When milk warm, stir in one-half cupful of yeast. Keep in self sealing glass jars.

BROWNING & CO.

51 West Second Street.

Gibson Hazelhurst of Beach Springs, Neshoba county, Mo., an inventor unknown to fame, is endeavoring to interest capital in a scheme he has perfected for the running of vehicles that he claims will revolutionize the world, says the Boston Traveller. He will make it possible, he says, for anybody to have a wagon that will run without horses at practically no expense beyond wear and tear.

"In brief," he explains, "my invention works this way: I will take an ordinary locomotive, for instance, tear all the works out of it and place new wheels on it. These wheels are an invention of my own, and are made according to a plan I have perfected after several years of study. The secret of the construction lies in the tires, which are made of wood and steel. I have invented a magnet of rare power and lasting. In front of each of the wheels I place one of these magnets at an angle known only to myself. The magnets will be arranged in sliding grooves, connected with levers under the control of the driver. When the vehicle is standing still, they are kept far enough away from the wheels to lose the effect. When it is desired to start, all that is necessary is for the driver to pull one of the levers, the magnet gets close enough to the wheel to get the current to work, the steel portions of the tire are drawn toward the magnet, and the wheel goes around. The speed can be regulated by the distance the magnet is held from the wheel by the lever. If a load is being pulled or if it is intended to go faster than one magnet can draw, it is an easy matter to put one or more of the other magnets in operation. I figure that with four of my patent wheels, each equipped with one of my improved magnets, I will be able to move an ordinary locomotive drawing a train of eight Pullman cars at from 200 to 400 miles an hour as long as the passengers on the train can stand the strain." It was suggested to the inventor that it seemed likely to a man who knew nothing about it that a train of cars would be necessary to go in front of the engine and carry the magnets. "Not at all—not at all," remarked Mr. Hazelhurst enthusiastically. "On the contrary, the magnets are not much larger than a flour barrel. The power in them is placed there by a process known only to me. I can take an ordinary pocket magnet, treat it with my preparation and put enough power in it to lift a crowbar."

Memorizing Music.

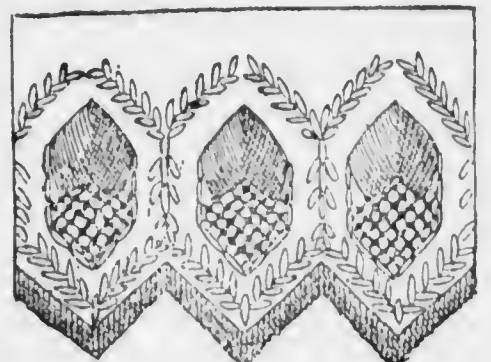

A writer in The Etude has the following to say on a subject of widespread interest to music students:

In learning a concerto, I first divide it into phrases and thoughts by reading. Then I learn the finger work, to make every motion perfect. This is horrible drudgery, but essential. No matter what you think in a piece, you cannot express it till you have mastered the mechanism—which means completely mastered it. Then comes the altering of the personality or the sinking of self in the thought of the composer. This must be done in music as in acting. Hints of any kind and of the smallest size are invaluable at this time—anything as to the composer's mind, habits of thought, inspiration for this particular composition, etc.

A comfort sure to be appreciated by housekeepers in hot weather is a dumb waiter in the pantry where all the perishable food can be placed and easily lowered into the cellar. Then at the next time for meals it has only to be raised again. Think of the trips up and down the cellar stairs all summer long, wearing out strength and patience and good nature, or if one is fortunately proof against the latter temptation, at any rate wearing out one's muscles and nerves. And, as a Country Gentleman correspondent very truly adds, the dumb waiter is not at all a difficult thing to construct if there are tools enough and skill enough to use them in the family. If not, call in the neighborhood carpenter.

Vandyked Border.

Buttonholing, feather, satin and cross stitches are called in requisition for this useful edging on white or colored flannel, linen or cambric, wrought with colored silks, shotland wool, or embroidery cotton, and suitable for underlinen, flannel petticoats, knickerbockers, children's pinafores and slips.

USEFUL VANDYKED EDGING.

nel, linen or cambric, wrought with colored silks, shotland wool, or embroidery cotton, and suitable for underlinen, flannel petticoats, knickerbockers, children's pinafores and slips.

PROGRESS SHOE STORE

THEY WIPED THEIR COARSE RED WHISKERS ON THE SNOWY TABLE CLOTH.

sassin succeeded him. In those days assassination and inauguration seemed to go hand in hand.

After Constantine, who died 306 A. D., came Constantine the Great, his son by a British princess.

Under Constantine peace again reigned, but the Irish, who desired to free

thus ended the Roman dominion over Britain.

The Saxons were at that time a coarse people. They did not allow etiquette to interfere with their methods of taking refreshment, and, though it pains the historian at all times to speak unkindly of his ancestors who have now passed on to their reward, he is compelled to admit that as a people the Saxons may be truly characterized as a great national appetite.

During the palmy days when Rome superintended the collecting of customs and regulated the formation of corporations the mining and smelting of iron were extensively carried on and the "walking delegate" was invented. The accompanying illustration shows an ancient strike.

Rome no doubt did much for England, for at that time the imperial city had 384 streets, 56,567 palaces, 80 golden statues, 2,785 bronze statues of former emperors and officers, 41 theaters, 2,291 prisons and 2,300 perfumery stores. She was in the full flood of her prosperity and had about 4,000,000 inhabitants.

In those days a Roman senator could not live on less than \$80,000 per year, and Marcus Antoninus, who owed \$1,500,000 on his inaugural March 15, paid it up March 17 and afterward cleared \$720,000,000. This he did by the strictest economy, which he managed to have attended to by the peasantry.

Even a literary man in Rome could amass property, and Seneca died worth

ASSASSINATION OF CARACIUS.

Ireland even if they had to go abroad and neglect their business for that purpose, used to invade Constantine's territory, getting him up at all hours of the night and demanding that he should free Ireland.

These men were then called Picts; hence the expression "picked men."

THE PICTS INCULCATING HOME RULE PRINCIPLES.

They annoyed Constantine by coming over and trying to introduce home rule into the home of the total stranger.

DISCOMFORTS OF THE LABOR AGITATOR. \$12,000,000. Those were the flush times in Rome, and England no doubt was greatly benefited thereby; but, alas! "money matters became scarce," and the poor Briton was forced to associate with the delirium tremens and massive digestion of the Saxon, who floated in a vast ocean of lard and wassail during his waking hours and slept with the cunning little piglets at night. His earthen floors were carpeted with straw and frescoed with bones.

Let us not swell with pride as we refer to our ancestors, whose lives were marked by an eternal combat between

INDICATIONS.

Fair weather; light to fresh southeasterly winds; warmer in northern portion.

It is announced from Frankfort that Governor Bradley has snubbed Mayor Julian, of that city, because he called an indignation meeting of the citizens of Frankfort when the troops were ordered out. A snub from Bradley will not cause Mr. Julian any worry.

To Music Pupils.

The Etude makes the following suggestions to pupils:
 Be prompt at the hour when you have engaged to take your lessons.
 Have a set time for practice and do it thoroughly and systematically.

It is a good plan to divide your practice time—a portion in the morning and the other part in the afternoon or evening.

Practice your scales and technical exercises first; then your other work will become easier, for your fingers have become more pliable.

Listen to and mentally criticize your own playing. Note particularly the time, key, touch, rhythm, expression and character of your music.

Do not attempt to play a "piece" without your music until you can play it perfectly with the notes before you.

In memorizing be careful of the smallest detail and constantly refer to your music when in doubt.

In "playing for company" choose such music as you are sure you can play with ease.

Soak one-third of a box of gelatin in a pint of cold milk for an hour, then place over the fire and stir till dissolved; add one-half pound of sugar. Whip a quart of cream with an egg beater, removing the froth as it forms. Stir the gelatin and milk till it is cool and begins to thicken; add the whipped cream, beat all together and pour into molds lined with sponge cake or lady fingers. Cool on ice, or it may be prepared the day before using.

THE DUTY OF DEMOCRATS.

Bradley B. Smalley Says They Should Stand For Sound Money.

[New York Times.]

Bradley B. Smalley, of Vermont, is the Democratic National Committeeman from his State, and has been one of the most influential Democratic managers of National campaigns for the last sixteen years.

It was suggested in his presence in the corridor of the hotel last night that there is a desire on the part of some so-called leading Democrats in this and other States to remain away from the convention in Chicago.

"I cannot see why they should do so," said Mr. Smalley. "It is certainly the duty of all Democrats who can do so to go to the convention, and do all in their power to secure the adoption as a part of the Democratic party platform of a sound-money plank that will show the people that the Democracy is in line with President Cleveland in maintaining the National credit and the integrity of our currency."

"This is the time for genuine Democrats to stand firmly by their party and to defend to the best of their ability the sound principles of government for which the party really stands, and which cannot be obscured by temporary reverses or present difficulties. The Democratic party is not dead, nor will it soon die. It will reassert itself before very long in a way that will fully demonstrate this fact."

Mr. Smalley was asked whether in case a proper platform is not adopted at Chicago, he would be in favor of bolting.

"No," said Mr. Smalley, "I would not favor a bolt. There is, as I have said, a great future for the Democracy, and the thing for its friends to do is to stay within the party organization, so that when the proper time comes they can have their share in properly directing the affairs of the party."

The things that people see are inside of them and not outside. No two people see the same thing exactly alike. One woman may look out at a beautiful landscape and see all the beauty and restfulness and grandness that there is in it. Another one will look out at the same scene and see nothing. The man who is perfectly well and vigorous enjoys life to the full. Dr. Pierce's Golden Medical Discovery makes people well. There isn't anything miraculous about it—it is the most natural thing in the world. It simply puts the digestive organs, the stomach, the liver, the bowels, in perfect order and thereby makes the blood pure and rich. All diseases live and thrive on impure blood. Keep a stream of pure, rich, red blood flowing into a diseased spot, and the disease will not stay. A man lives on rich, pure blood, and disease dies on it. Dr. Pierce's Golden Medical Discovery makes pure, rich blood. Send 21 cents in one-cent stamps World's Dispensary Medical Association, Buffalo, N. Y., and receive Dr. Pierce's 1008 page Common Sense Medical Adviser, "profusely illustrated."

A GOOD IDEA.

Let's Give Free Turnpikes a Trial For a Month.

Pay the Companies to Throw Open Their Gates Once a Week For That Time.

Cheap excursions will no doubt prove a good thing for Maysville, and the Bulletin is heartily in favor of them and anything else that will bring people here.

While the business men of Maysville are engaged in this move, why wouldn't it be a good idea to give the free turnpike plan a trial also?

This could be done by arranging with the companies controlling the main lines leading into the city to throw open their gates one day a week for a month.

Such a plan wouldn't cost very much, and the companies could certainly advance no good reasons against the plan.

Let the business men pay the companies to throw wide open their gates once a week, let the dates be thoroughly advertised throughout the county, and in one month it could be demonstrated, it seems, to the satisfaction of all whether free turnpikes would prove a good thing for Maysville, and for the people of the county also.

If the companies are not unreasonable in their demands, all arrangements could soon be made, provided the business men of Maysville will take hold of it and go at it in earnest.

Let's try it for a month and note results.

At the meeting of the business men Thursday night, on motion of Mr. Simon Rosenau, a committee of nine was appointed with full power to decide on dates for the proposed excursions on the railroads, arrange for special attractions and perfect all the details. The gentlemen composing the committee are Messrs. Hechinger, Chairman; R. L. Browning, John M. Hunt, E. A. Robinson, Simon Rosenau, J. Wesley Lee, John T. Martin, Thomas A. Davis, Ben T. Cox, John Duley, M. C. Russell, W. W. Wicoff, E. H. Benzel.

Mr. E. A. Robinson stated that he had had a personal conference with Mr. C. B. Ryan, Assistant General Passenger Agent of the C. and O., and that Mr. Ryan would give the merchants a rate on his regular trains, without exacting any guarantee whatever.

Mr. R. L. Browning, of the Committee to confer with the L. and N. Railway, read a letter from the officials of that road agreeing to run a train between Paris and Maysville for \$150.

Mr. W. W. Wicoff, of the Committee to confer with the C. and O., read a letter from Mr. Ryan offering to co-operate with the merchants if Maysville will offer some attraction to draw people to the city.

The above General Committee has been subdivided and assigned as follows:
 On Attractions—Messrs. Simon Rosenau, Ben T. Cox, J. Wesley Lee.
 On Advertising—David Hechinger, Thomas A. Davis, M. F. Marsh, John M. Hunt, John T. Martin.

On Railroads—E. A. Robinson, M. C. Russell, John Duley, W. W. Wicoff, E. H. Benzel.

The following subscriptions to the Excursion Guarantee Fund are reported:

Hechinger & Co.	15 00

The People's New Officers.

The People's Building Association has elected officers for the ensuing year, as follows:

President—W. LaLue Thomas.
 Secretary—Robert L. Baldwin.
 Vice President—Chas. B. Pearce.
 Treasurer—John Duley.
 Attorney—Clarence L. Sallee.
 Directors—Charles B. Pearce Jr., C. C. Dobyns, E. A. Robinson, R. L. Browning, R. P. Jenkins, James H. Sallee, Geo. W. Rogers, Louis Hoser, Robert L. Baldwin, W. T. Cummins, J. Banks Durrett.

Bucklen's Arnica Salve.

The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by J. James Wood.

That

Extremetired feeling afflicts nearly everybody at this season. The hustlers cease to push, the tireless grow weary, the energetic become enervated. You know just what we mean. Some men and women endeavor temporarily to overcome that

Tired

Feeling by great force of will. But this is unsafe, as it pulls powerfully upon the nervous system, which will not long stand such strain. Too many people "work on their nerves," and the result is seen in unfortunate wrecks marked "nervous prostration," in every direction. That tired

Feel-

ing is a positive proof of thin, weak, impure blood; for, if the blood is rich, red, vitalized and vigorous, it imparts life and energy to every nerve, organ and tissue of the body. The necessity of taking Hood's Sarsaparilla for that tired feeling is, therefore, apparent to every one, and the good it will do you is equally beyond question. Remember that

Hood's Sarsaparilla

Is the One True Blood Purifier. All druggists. \$1. Prepared only by C. I. Hood & Co., Lowell, Mass.

Hood's Pills are easy to take, easy to operate. 25 cents.

A Luncheon Party.

According to The Ladies' Home Journal, it is in better form to have a luncheon served at a large table, especially when the guests do not number more than 20, than to have small tables. Decorate your tables with flowers and have the rooms darkened and the gas lighted. It is not necessary to darken the whole house, but only the room in which the luncheon is served. Two o'clock is the fashionable hour for a luncheon. After it is over the guests usually disperse.

Strawberry Preserves.

A delicious preserve may be made by hulling strawberries that are free from blemish and not overripe and placing them in a porcelain kettle with their weight in white sugar. Allow them to stand overnight and in the morning set them over the range and let them boil steadily for an hour. Not a drop of water should be used. The juice from the berries will furnish all the liquid necessary.

The surest pleasures lie within the circle of useful occupation. Mere pleasure, sought outside of usefulness, is fraught with poison.—Beecher.

TOM CUMMINS is one of the happiest fellows in town to-day. It's a fine son, born Friday afternoon.

Get your ready-mixed paint at Chenoweth's drug store. An analysis of their paint shows it to be made of white lead, linseed oil and coloring matter.

TWO COMIC FARCES.

"The Bicycler" and "Proposing Under Difficulty"—See Them at Opera House May 20th.

It's a go and you must go. Where? To the opera house next Wednesday night, May 20th, to see two splendidly interpreted and comically absurd farces entitled "The Bicycler" and "Proposing Under Difficulty." The company of players is made up of our best performers, and those who attend can rest assured of being highly entertained.

Don't forget also that the money which you pay for a seat will go into the fund for maintaining a ball club in our city. If we strike now we can get together a better, or as good, a team as the one which carried Maysville with a flaming torch of glory from the Atlantic to the Pacific and cross country wise.

Tickets are 50 and 35 cents and can be reserved without extra cost.

When Baby was sick, we gave her Castoria.
 When she was a Child, she cried for Castoria.
 When she became Miss, she clung to Castoria.
 When she had Children, she gave them Castoria.

Sale of the Nelson Property This Afternoon.

The Nelson property on south side of Second street, a few doors east of Market, formerly occupied by Geo. T. Wood as a warehouse will be sold at 2 o'clock this afternoon by Master Commissioner Kehoe.

State Encampment G. A. R.

On above account the L. and N. R. R. will sell round-trip tickets at one fare to Somerset, Ky., via Lexington or Junction City May 17th, 18th and 19th. Return limit May 23rd.

WE WILL NOT DECEIVE YOU.

Every item we name we own. You can never say you were lured to disappointment by any printers' ink above our signature.

Commencement Gowns.—A varied and pretty assortment for your selection—Dimities, Organdies, Swiss plain and dotted, Mull, India Linen and other dainty fabrics with laces and ribbons for adornment. If you want a cool, airy, stylish commencement gown at a moderate cost, let us show you our stock or write for samples. The price starts at 10 cents and stops at 1.00.

Store Notes.—Ask for the Acorn brand of Shirt Waist. It has the finish and style you want; well-made sleeves, not the bagging, sagging ones, that caricature so many waists.

There's a big "Jumbo" Damask Towel clamoring for a place in print; rich borders, fringed or hemstitched; was 35c., is 25c.

Want to emphasize that Lining stock of ours. It pays to buy good linings and that is the kind we have.

Unlaundered Shirts.—You may not know we carry two grades of unlaundered Shirts. They outrank any shirts ever offered for the money. We warrant the fit; we warrant the make-up. We do more. If not in every way satisfied after trying on, your money returned. In stock the year round. Give them a fair test. You are our shirt customer if you do. Prices 50c. and 1.00.

Kid Gloves.—We try to keep this stock right up to the top notch of usefulness. Same with Gloves as with other merchandise. If not right any time we will make them right.

Fans.—Big, little, light, drak, paper, silk, open, closed. Empire designs in a varied collection. Palm and Japanese fans galore; 1 cent initiates the price, 1.50 closes it, with 5, 10, 15, 25 cents as in-betweens.

D. HUNT & SON.

A VISIT TO TENNESSEE

That Recalled the Bloody Battle of Stone River—The Money Question.

Judge Wall returned from Tennessee Thursday. He was in Nashville for awhile, and reports the free silverites as very aggressive, though he found a strong undercurrent amongst the business men in favor of sound money. He says that at Nashville, Murfreesboro, Tullahoma and Winchester, the men in active business, requiring a sound and stable currency, were opposed to the idea of free and unlimited coinage, whilst the politicians and men of small means and men out of work favored free silver; the ruling idea being that free silver meant plenty of money, plenty of work and general prosperity.

It was Judge Wall's first visit to the above points since the winter and spring of 1862-3, but he recognized many of the places where he had encamped with General John H. Morgan's command, and especially the points of interest about Murfreesboro or Stone River, at which battle he was attached to Burns' Battery of Louisville, and witnessed the slaughter of Breckinridge's command and the wounding of General Hanson.

The earthworks are still visible, and all points of that memorable battle are easily located by them. Burns' Battery was located between the famous Cobbs' Battery and the Washington Artillery of New Orleans, and the charge of the 6,500 Kentuckians, under the command of General John C. Breckinridge, was made in front of these batteries, and 2,100 were killed and wounded in thirty minutes.

A National cemetery is located there in which 15,000 of the Nation's dead are buried.

The Late J. M. Hawley.

The following members of Maysville Commandery No. 10, K. T., left in carriages early this morning to attend the funeral of their late brother, Sir Knight J. M. Hawley: Sir Knights E. A. Robinson, R. L. Browning, J. D. Dye, L. C. Blatterman, James H. Sallee, John W. Alexander, R. P. Jenkins, H. C. Sharp, H. D. Watson, A. H. Thompson, George W. Rogers, G. S. Wall, A. E. Cole, H. L. Watson, J. Lud Browning, Clarence Mathews, W. N. Howe, E. T. Hancock, M. C. Russell, D. C. Franklin.

The funeral occurred at Canaan Church at 10:30 a. m. after which the remains were laid to rest at Mt. Olivet Church.

Reduced Rates.

The L. and N. R. R. will sell round-trip tickets at one fare, as follows:

To Memphis, Tenn., May 14th, 15th, 19th and 20th, on account of Woman's Board of Missions C. P. Church and General Assembly Presbyterian Church.

To Richmond, Ky., May 25th, 26th and 27th, on account of Knights Templar Conclave.

To Paducah, Ky., May 28th, 29th and 30th, on account of State Convention Christian Endeavor Society.

Daughters of American Revolution.

Mrs. G. W. Blatterman has been appointed Chapter Regent of the Daughters of the American Revolution by the National Board of Management at Washington City. She has received all necessary "application papers" and will be at home every morning to receive any ladies who wish to join the chapter and take out papers.

Monitor Ranges.

Ranges made by the best manufacturers in this country, from \$25 up and warranted. If not as represented you can find no one hour in the day at my store. See me before you buy from any one. I will save you money.

W. F. POWER.

VALUABLE

Investment PROPERTY

FOR SALE.

A large, two-story double tenement house, constructed of the best material, containing twelve large, light rooms, water &c. All practically new, costing \$3,200. Situated on East Fourth street in Maysville, Ky., which rents for \$21 per month. Is offered upon the following easy terms to a responsible party: For

\$2,000,

Payable in 100 monthly installments of \$20 each, with interest at 4 per cent. It will be seen that the rent in 100 months will pay for the property. For inspection of the property and further information see
 MIT. J. N. KEHOE,
 1616 Court street, Maysville, Ky.

PERSONAL.

—Mr. Charles Redmon, of Paris, was in town Friday.

—Mr. C. L. Hook, of Augusta, spent part of the day here Friday.

—Mr. H. H. Key, of Peach Orchard, Ky., was in town Friday.

—Mr. J. B. Sherwood, of Enterprise, Ky., was in town on business Friday.

—Mr. and Mrs. Sam McDonald, of Cincinnati, are guests of Mr. and Mrs. S. Nelson.

—Mr. J. H. Spooner and wife and Dr. W. T. Shrawl, of Chicago, are registered at the Central.

—Messrs. A. L. Vansant and L. B. Palmer, of Flemingsburg, were registered at the Central Friday.

—Mrs. C. W. Metcalfe, of Pineville, Ky., arrived here last night on her way to Augusta to visit relatives. She was accompanied by her sister, Miss Myrtle Gray, who had been her guest. Their brother, Mr. C. L. Gray, came up last evening to meet them and they all left for Augusta this morning.

Do Not Do This.

Do not be induced to buy any other if you have made up your mind to take Hood's Sarsaparilla. Remember that Hood's Sarsaparilla cures when all others fail. Do not give up in despair because other medicines have failed to help you. Take Hood's Sarsaparilla faithfully and you may reasonably expect to be cured.

Hood's Pills are purely vegetable, carefully prepared from the best ingredients. 25c.

New Time Card.

The C. and O.'s new time card will go into effect to-morrow. The only change that will be made in the schedule at this place will make No. 3 arrive here from the East at 4:25 p. m. instead of 4.

All over, you feel good, after riding a Christy saddle. Call and see.

J. T. KACKLEY & Co.

Masses at St. Patrick's Church Sunday will be at 7, 8:30 and 10 a. m., which will be thirty minutes earlier than usual. Sunday school, vespers and benediction at the usual hours.

Books are now open for subscription to stock in the sixth series of the People's Building Association, commencing May 2, 1896. Call on Robert L. Baldwin, Secretary, John Duley, Treasurer, or any of the directors.

The Y. M. C. A. men's gospel meeting will be held in the hall to-morrow afternoon at 3 o'clock. Mr. J. W. Asbury will lead. Good music and an enjoyable time assured all. Come out and help yourself and others.

SERVICES at the Central Presbyterian, First Presbyterian, Third street Methodist and First Baptist Churches at usual hours to-morrow. Rev. Joseph Faber, of Bellevue, will preach at the Third street M. E. Church. At First Baptist Church at 10:30 a. m., the pastor will give an account of the meeting of Southern Baptist convention. Rev. M. B. Adams, of Lewisburg, will preach at night at this church.

CYCLE CIRCLES.

Hamilton Tells What is Transpiring in Local Wheelodm.

Bicycling as a Healthful Exercise. The New Recruits—Runs and Runs.

THE RACER.

The sailor to the wavy sea
To spin his gallant keel;
But give me a spin
In a ride to win,
The spin of the gallant wheel.

The Arab wild to his desert sands
With a mount on a fiery steed,
But give me the course
On a swift steel-horse
That rivals the wind in speed.

The minstrel to his violin,
Sweet strains so wild and free;
But the bleyele's hum
Like a rattling drum
Is music enough for me.

The hunter's pack and the wild gazelle
May thrill the hunter's nerve;
But give me the track
With the field at my back
As into the stretch we swerve.

—Billie Veerus.

SWEET BY AND BY.

When the spring time comes, gentle Annie,
And the wild flowers scatter o'er the plain,
They'll put on our knickerbockers, gentle Annie,
And we'll ride on our bicycles again.

A GOOD LIGHT.

Let your light be trimmed and burning,
Send ahead a cheerful ray,
It will help you and help others
As you wheel along the way.

OUTINGS AT HOME.

This is the season of the year when the outing has its inning. Everybody is supposed to go somewhere about now, for a change of scene and thought.

But as a matter of fact only a very small percentage of the people enjoy the pleasures of a summer outing. For the great majority of mankind, life is a treadmill that must be kept turning all the while. Existence is growing to be more mechanical. Every man is a wheel of more or less importance in the machinery of business.

The favored few are permitted to go on extended tours, but the many more must remain within touch of duty. To the great army made up of the latter class, the bicycle is of incalculable worth. It puts them within reach of field and forest and all the ineffable charms of nature. It gives them in an occasional half holiday or a leisure evening hour, the opportunity to enjoy the world of beauty which without the wheel would be to them a closed book.

The business-prisoned toiler in the heart of a great city who can hear above the ceaseless din of the marts of trade the croon of the bees in the clover, the babble of brooks singing their way through bosky dingles, and the thousand sweet and subtle voices of nature, refreshes his tired spirit at a fountain whose soothing and healing properties are as dew to a thirsty flower.

The delver who sees, beyond the dull

rounds of his work-a-day tasks, the dappled fields of undulating grain and grass, the ferns weaving their flossy fingers about the moss-grown trunks of giant trees; the flash of the red bird's wing like a tongue of flame darting among the emerald branches; or the yellow hutterflies like a cluster of intense sun-beans, dancing about the margin of a pool, find a rest for that inner eye that is balm to a weary brain and heartsease to a troubled breast.

The eye is the body's great physician. What it looks upon is the medicine it administers. Persons are sometimes struck dead, driven hopelessly insane or made more or less ill by what they see. The eye also administers the slow poison of a business slave's dull surroundings. On the other hand it will, if permitted, give the patient sweet and healing draughts from flowery fields, balmy woods and all the blissful laboratories of nature.

But even the best of medicine must not be taken in too heroic doses, else its effect may be the opposite of that desired. Too much of an outing is not a good thing. The joy of getting home again has become recognized by many as the most delightful part of a summer vacation trip.

To the great army of wheelmen whose outings consist of utilizing the little patches of time as they happen along, this "tired feeling," born of an overdose of sight seeing, will never come. They take their summer medicine in easy, regular, moderate doses, and are always within reach of home with its gracious ministries of comfortable surroundings and good nurses.

It is a well understood fact that the wheel is tending to keep many from going on faraway, nerve-racking, purse-depleting jaunts. The coming of the bicycle has brought such a large area of country within reach of home that it is not so necessary to become a wanderer among strangers in order that one may see many new and beautiful scenes and yet sleep in his own good bed at night.

This thing made possible by the bicycle is of great worth to mankind. It has an influence on the moral and industrial life that the unthinking would never dream of. With the happy help of the wheel, pleasure, like a bright and refreshing wof of rest may be woven amid the never-ending warp of duty. It is the good friend of humanity.

A TEMPERANCE REFORMER.

The drinking habit is being lessened in a noticeable degree, so some saloon-keepers say, by the widespread use of the bicycle. Now and then there is a man who can get so much liquor in him it would drown him if he were in it, and yet he can walk home and convince his wife that the peculiar scent on his breath comes from taking cough syrup the doctor prescribed, or from eating a perfectly innocent clove. He may even be able to glibly repeat the words "truly rural" or "she sells sea shells," but the chances are he could not, though he were an expert bicyclist, mount and ride a wheel under the then existing conditions. The bicycle itself is a born wobbler. Left to its own inclinations and it will lie down, if it has anything like a fair chance. It doesn't like the smell of liquor, so they say. Just the minute liquor is breathed on the front tire and handle bars of a bicycle it begins to waver and wiggle and wobble. It is looking for trouble. Under such conditions it is very likely to run into a lamp-post or a stone wall, or plunge into a ditch and lie there till it sobers up. The bicycle is, by its very inherent nature, a teetotaler. It is great on curves but is no good in rye-tangles. Next to having sound lungs, a bicycle must have a clear brain and an easy conscience. But the bicycle is an advocate of temperance, not because it cannot drink, but because the whole atmosphere of its surroundings tend to make it desire temperance. The bicycle is the very embodiment of healthful exercise, pure country air, happy fields, whispering forests, shady lanes, smiling sunshine and all the gracious sights and scents and sound of glen and glade. Would any one forego these to loiter about in the distressed atmosphere of a dram shop, or trade the joy of them for a be-fuddled brain? The sermon which the fields and flowers, the brooks and the birds, the sea and the shore and the sky preach, get into the blood. Their medicine is the very best when properly taken—on a bicycle.

THAT SWEATED.

Some one asked me what was the best method of cleaning a sweater, so I write to say that the best method I know of is to wash it in warm water in which borax has been dissolved, say one tablespoon to a pail of water, and rinse in warm water.

TO FIND THE GEAR OF YOUR WHEEL.

Multiply the diameter of driving wheel in inches by the number of teeth in large (front) sprocket, and divide by number of teeth in (rear) small sprocket. This will give gear in inches.

LOCALISMS.

Good horses and good vehicles count for but little if the road is poor.

Stone isn't good to sleep on but it makes the best kind of roadbed.

A clean street compelleth admiration, but a mud heap is an abomination.

Sods are good for a lawn, but the ideal road should be made of something else.

A merciful man will join the League of American Wheelmen and assist in securing good roads.

The farmer who believes in the protection of his home market is opposed to the awful tariff levied by bad roads.

"The scorching must go" is the cry in Chicago and New York. Why, of course he must. He generally does. In Maysville he goes like greased lightning.

Dr. Bicycle treats the blood by the means of healthful exercise. Play the sweet keys if you'd keep them in tune.

Mrs. Shultz Wood, Mrs. Jas. Kackley, Mrs. Thos. Russell and Messrs. J. T. Kackley and Ed. Nesbitt made the run to Flemingsburg and return Thursday.

We have it from a reliable source that Dr. John T. Fleming, Dr. Frazee and Mr. James Shackelford are trying to conquer the silent steed in the alley next to their place of business.

Mr. T. Willet broke one of the pedals off his wheel while ascending a steep hill one mile from Augusta Sunday, necessitating his walking in and coming home on the morning train.

The heaviest cyclist in the world is said to be Dr. Meldon, of Dublin, who weighs 378 pounds. He also plays lawn tennis. Our friend Jo. Grimes is the next heaviest and tips the scales at 375.

Mr. Pearce Browning went to Lexington Tuesday morning and returned Wednesday morning. Mr. Browning is developing into a long distance rider. He made the round trip, 127 miles, in nine hours, riding a "Rambler."

The new recruits: Miss Frances Cake, Miss Annie Lee and Messrs. W. W. Wikoff, Lewis McCarthy, William Berry, Az. Thomas, John Young, and Masters Buford Chenoweth, Suddith Calhoun and John Calhoun.

Mr. Pearce Browning met with a painful accident last week. While riding near the fair grounds his wheel got into a rut throwing him over a ten-foot embankment, severely straining his ankle. We are glad to say that Pearce is improving and is able to ride again.

Owing to some misunderstanding the Maysville Bicycle Club did not all go to Augusta Sunday but split in several parties. The following runs have been suggested for Sunday, and all those desiring to go will meet promptly at 6 o'clock at postoffice corner: to Blue Licks, Mt. Olivet and Flemingsburg.

The following runs were made Sunday: To Fern Leaf, Minerva, Augusta, Higginsport and Ripley, Messrs. Ed. Stoker, Willett, Diener and Heiser; to West Union, Messrs. Jas. Egnew, Barkley, Owens and Holmes; to Lewisburg, Messrs. Tronta, Lee, Chris Russell, Wells and Ballenger; to Carlisle, John Stoker; to Blue Licks, Messrs. Lilliston, Shaw and Pearce.

A correspondent asks us to point out the advantages of barrel hubs. We have never been able to see any advantage, but regard it as one of those facts which the public demands every now and then. It is very much the same as the two buttons which every man wears at the point where his coat-tails intersect the coat. No one can tell exactly why they are there, and yet it would be decidedly unfashionable to leave them off.

The following gentlemen contemplate making the run to Cincinnati the latter part of this month: Messrs. Ed. L. Stoker, John C. Rains and Will G. Heiser. Any one desirous of accompanying these gentlemen will let them know before the 25th. The road is good all the way and from Ripley to Cincinnati there are no hills. The route along the river through Lovanna, Higginsport, Moscow, New Richmond, Coney Island, Columbia and in to Cincinnati via Eastern avenue.

No Babies on Bicycles.—Chicago medical men say it injures the tots. Chicago, May 13.—The fond father, the admiring uncle and the doting big brother, who have been in the habit of strapping baby into a basket or other contrivance and giving the youngster a ride on the bicycle, must forego that sort of amusement or incur the liability of prosecution. Such is the edict of the Illinois Humane Society. The officers of the society have been giving the matter serious investigation. The brunt of a shock when a collision occurs is only one of the least objections raised. Medical experts, they say, are convinced that the rapid and unnatural motion affects the child's brain. The official protectors of the children propose to invoke the aid of the law.

Any one desiring to join the League of American Wheelmen can send their name care BULLETIN to HAMILTON.

Cures, absolute, permanent cures have given Flood's Sarsaparilla the largest sales in the world and the first place among medicines.

FIRE INSURANCE.—Duley & Baldwin.

THERE IS AS MUCH PLEASURE IN SELLING GOOD CLOTHING AS IN WEARING IT!

The Colored Clay Worsted and Cheviot Suits we are selling at \$10 and \$12 are very desirable. We show them in half dozen different colors.

These Suits were made by the best of manufacturers, (we buy only of the best of manufacturers) and were intended for \$15 and \$18 Suits.

At our prices they are the greatest bargains we ever offered. They are thoroughly well made and trimmed, with extra good quality of lining.

If you feel interested, come in and spend a few minutes with us in looking at these Suits. If nothing else it will at least post you in prices on good clothing.

HECHINGER & CO.

The Centre of Trade in Shoes

Hereabout is our establishment. This is a thing more easily seen than told and is no sooner seen than recognized. Nothing looks its worth and value so plainly and undeniably as a Shoe. Our Shoes tell their superiority so eloquently and persuasively that to see them is to decide to wear them. The kind of a Shoe you want does not signify. We carry all sorts and kinds and sizes except poor Shoes, and can fit any foot. Our prices are right.

F. B. RANSON & CO.

FATALLY WOUNDED.

An Affray in Wilson Bottom—Will Likely Result in the Death of One of the Participants.

Harrison Wills, a farmer living about a mile west of South Manchester, was fatally injured Friday afternoon in a fight with three neighbors, Joe Hoop and his son, Bob, and Marion Haven.

The trouble arose over a plow which Wills loaned to the Hoops. He went after it, when the three, it is said, attacked him.

His skull was cut open, exposing the brain.

Suit For Office of Chief of Police.

Mr. M. E. McKellup has filed suit in the Circuit Court against Mr. D. P. Ott to cast him from the office of Chief of Police. The plaintiff claims he was elected last November and is entitled to the office. E. L. Worthington and Whitaker & Whitaker are his attorneys.

When Nature

Needs assistance it may be best to render it promptly, but one should remember to use even the most perfect remedies only when needed. The best and most simple and gentle remedy is the Syrup of Figs, manufactured by the California Fig Syrup Company.

Ice cream soda at Armstrong's.

New vegetables, fancy berries—Calhoun's.

A \$100 bicycle at a bargain. Call at once. J. T. KACKLEY & Co.

Mrs. JOHANNA COUGHLIN and family have moved to West Third street, between Wall and Short.

The Pastor's Union will meet in the study of Rev. John S. Hays at Hayswood on Monday afternoon at 3 o'clock.

MR. AND MRS. ROBERT LUMAN, of Lexington street, are rejoicing over the arrival of a fine son at their home this week.

EVERY can of Ray's Rainbow Ready Mixed Paint is guaranteed not to peel, chalk or crack. Found at Postoffice Drugstore.

MR. WILL L. KEEFER, of Thomasville, Georgia, has presented his nieces, Misses Hattie, Georgie and Alice Dobyns, with a handsome wheel each.

At the Church of the Nativity to-morrow services will be: Sunday school at 9:30 a. m.; Litany, sermon and Holy Communion at 10:30; evening prayer at 7:30.

BALLENGER's reasonable prices and variety of qualities put hundreds of beautiful and appropriate articles of jewelry within the reach of most everybody. What he sells he guarantees to be just as represented.

DESIRABLE

PROPERTY FOR SALE.

The residence of the late John McCarthy, situated on the south side of the Germantown pike, just outside the city limits, will be sold privately for the sum of

\$1,000

The lot is 100 feet front by 105 feet deep. Is a splendid location for a home, has a good garden and a never-failing spring of good, clear, cool water. The house contains four rooms and two halls and is a bargain for any one desiring a home, or as an investment. Apply to

M. J. MCCARTHY,
BULLETIN OFFICE.

BOYS', YOUTHS', Tan Shoes!

J. HENRY PECOR.

L. H. Landman, M.D.,

Optician, 311 W. Sixth street, Cincinnati, O., will be at the Central Hotel, Maysville, Ky., on Thursday, JUNE 4, returning every first Thursday of each month.

Glasses adjusted to all forms of defective vision at popular prices.

ASSIGNEE'S NOTICE TO CREDITORS.

The creditors of Joseph F. Walton are hereby notified that any day within three months, beginning April 11th, 1896, at my home near Germantown, Ky., or at law office of Sullivan & Salter, Maysville, Ky., I will receive claims against his estate, verified according to law. All persons owing the estate are requested to settle with me promptly.

CHARLES T. CALVERT,
Assignee of J. F. Walton.

April 11th, 1896.

JAMES N. KEHOE,
Attorney at Law.

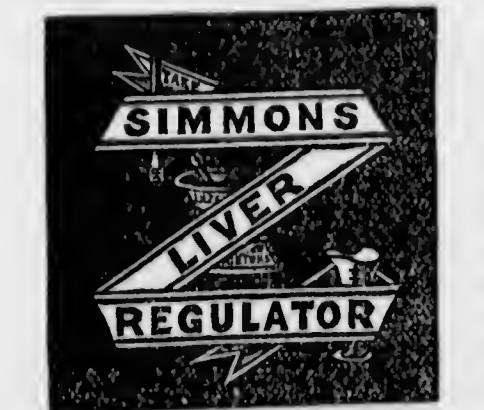

Office: Court street, east side.

FOR SALE.

FOR SALE.—A good second-hand cooking stove. Apply at this office.

Closing Out Sale of M. Gunn. I am closing out the entire stock—harness, saddles, collars and everything in this line. For next ten days will sell goods below cost. Now is the time to save money. W. R. Zeeb, assignee, Market street.

ACCIDENT ins. tickets. W. R. Warder.

THE BEST SPRING MEDICINE

is SIMMONS LIVER REGULATOR. Don't forget to take it. Now is the time you need it most to wake up your Liver. A sluggish Liver brings on Malaria, Fever and Ague, Rheumatism, and many other ills which shatter the constitution and wreck health. Don't forget the word REGULATOR. It is SIMMONS LIVER REGULATOR you want. The word REGULATOR distinguishes it from all other remedies. And, besides this, SIMMONS LIVER REGULATOR is a Regulator of the Liver, keeps it properly at work, that your system may be kept in good condition.

FOR THE BLOOD take SIMMONS LIVER REGULATOR. It is the best blood purifier and corrector. Try it and note the difference. Look for the RED Z on every package. You won't find it on any other medicine, and there is no other Liver remedy like SIMMONS LIVER REGULATOR—the King of Liver Remedies. Be sure you get it.

J. H. Zeilin & Co., Philadelphia, Pa.

"Knocks Out All Others."

Battle-Ax PLUG

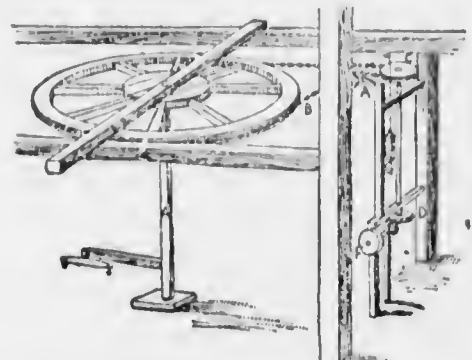

The Large Piece and High Grade of "Battle Ax" has injured the sale of other brands of higher prices and smaller pieces. Don't allow the dealer to impose on you by saying they are "just as good" as "Battle Ax," for he is anxious to work off his unsalable stock.

FARM GARDEN

HOMEMADE HORSEPOWER.

A Canadian Device Recently Described and Illustrated by Ohio Farmer.

The sketch illustrates a horsepower created on a farm floor in Blyth, Ont., and used in that section of country with satisfactory results for cutting straw or corn fodder. The large wheel in diagram is 12 or 14 feet in diameter, made of wood. The hub of the big wheel is 4 feet in diameter, made of inch boards nailed together with square hole in center to fit post. The spokes, eight in number, are 2 by 4 inch hemlock scantling, bolted to hub with two three-eighth inch bolts in each. The rim is made of three tiers of inch boards, cut the proper circle and about 7 inches wide. The two outside tiers project over the middle tier one inch, in order to

FOR CUTTING FODDER AND STRAW.

make groove for chain to run in. The post A in diagram is 6 inches square, hard wood, rounded off at each end to run in bearings on floor and in overlay. The big wheel is fastened on post high enough for horses to walk underneath. The chain B is a size heavier than common plow chain.

The jack in illustration is made from the gearing of an old Buckeye mower. It is shown fastened to post in barn. C is a wooden pulley 15 inches in diameter, with groove for chain and bolted to ratchet wheel, originally on the main shaft of the old mower. D is the bevel gearing and F is a wooden pulley bolted to cog wheel for belt or rope to connect with cutting box. X is the tightening pulley, hinged at (a) with weight G attached to keep chain taut.

It looks as if the near future would see the orange market of the United States well supplied. According to The Farmers' Review, the California orange crop for this year will be about 2,800,000 boxes, worth about \$5,000,000. These oranges grow on 10,000 acres of orange orchard. But there are said to be 80,000 acres of new and unbearing orange orchards in California. In Florida the great frosts of last year killed the orange trees over wide areas. The trees were cut off at the stumps and are now growing up, and some of them are scheduled to begin to bear in two years more. Altogether it appears that a great many trees of this kind of fruit are in process of growth.

Cabbage Root Maggot.

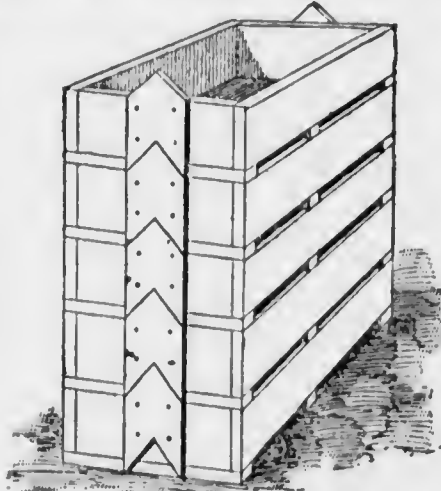

A correspondent of The American Agriculturist writes:

Last season I had some 3,000 cabbage plants. As soon as they were attacked by maggots I soaked a plug of ordinary chewing tobacco in about four pails of water and added a good tablespoonful of crude carbolic acid. Then with a small mouthed sprinker I put a little around each plant regardless of whether it was affected or not, and immediately they vanished and there was no more difficulty.

Market Crates.

Crates and boxes come handy for taking produce to market. When there is only one tier in the wagon box, no precautions are required, but for a number of tiers placed one above the other we need something to prevent the upper ones from sliding about. A bushel box much used by Iowa market gardeners and originally sketched and described in The Market Garden is made of white wood or good pine, as follows:

Take two side pieces a half inch thick, 5 1/4 inches wide, 36 inches in length, and two end pieces 1 inch thick, 5 1/4 inches wide, 12 inches long. The bottom can be made in one or more pieces. The angle pieces at the ends of boxes, as shown in accompanying sketch, are a half inch thick, fastened

BUSHEL BOXES FOR MARKETING.

with four screws. After the box is made up three strips, each a half inch thick and 1 inch wide, are nailed across the bottom. This makes an inch air space between each two boxes. Three strips of light iron are then nailed around the ends and middle of the boxes, which add much to their strength. Some vegetables, like peas, heat very quickly. The air space prevents this, and is also needed to admit of a better fill. Of course the dimensions of the box can be changed in each particular case to fit the wagon box, and they will be all right if made so as to hold 2,150 cubic inches.

A Good Thing.

Johnny (who has been watching a funeral for the first time)—Mamma, why do they all wear black?
Mamma—People always wear black when they have lost any of their family.
Johnny—And do they have to get everything new?
Mamma—Oh, I suppose so.
Johnny—Well, it's a good thing the Smiths' cat is black.

LIBRARY IN A COZY HOME.

No Particular Architectural Style, but Everything Arranged For Convenience.

The library in a suburban home, depicted in The Art Amateur, shows no attempt at carrying out any particular architectural style or mode of decoration, but everything is arranged for convenience in the first place, and, that secured, symmetry has been attended to, in

LIBRARY IN A SUBURBAN HOME.

the disposition of the bookcases chiefly. The room opens on the hall by a wide curtained doorway and receives some light through two windows, one on each side of the door, each filled with a single sheet of plate glass. These fill the space between the tops of the bookcases and the frieze.

Over the door is an oblong framed photograph. The round objects hung on the door posts seem to be specimens of Zuni or other Indian basketry, which is often very handsomely patterned in black or brown and yellow. The corner of the room has been cut off to make a closet for drawings, portfolios and books too valuable to be exposed on the open shelves. The upper part has glass doors. The large bay window, with its cushioned seat and side lights led in a colonial design, is one of the pleasantest features of the room. To be commended are the deep seated chair with its broad arm rests, on which may be laid book and paper knife or pad and pencil, and the handsome and commodious center table with its shaded lamp.

In suggesting a color scheme for such a room, the authority quoted insists upon keeping it light and simple. The wall paper should be a plain tint, of a celadon cast if the window faces southwardly, of a yellowish tone if it faces north. The slight window curtains are of lace. Those of the two lights giving on the hall may be of thin india silk, dull green or yellow, as the case may be. The portieres are of a heavy damask of silk and wool, the pattern being produced by the weave, not by any variety of colors. The rug is mainly in several tones of dull yellow and drab, with indigo blue in the alternate squares and as the ground color of the border. The floor is varnished brown. The woodwork, including the bookcases, is painted to harmonize with the walls, but if of any light colored wood, such as oak, might well be left of the natural color. The frieze might be distinguished from the body of the wall by a slight dotting with gold here and there, not all over.

The Popular Rarebit.

In its simplest form the modern rarebit consists in melting half a pound of mild American cheese grated or cut in little bits with a good sized tablespoonful of butter, adding gradually a gill of beer, ale or milk, a speck of cayenne and a teaspoonful of mustard. This is stirred over the alcohol lamp or fire until smooth and creamy and then poured over slices of delicately browned toast. Good Housekeeping, authority for the following, tells that a little bicarbonate of soda is usually added at the last, if any one fears indigestion, as the acid of the soda tends to lighten and separate the cheese particles. Rarebit No. 2 is a little more complicated in its structure, yet also easy of achievement and very popular. Melt 2 cupfuls of grated cheese with half a tablespoonful of butter; add gradually half a cupful of milk or cream, a whole egg or yolks of 2 well beaten and mixed with a tablespoonful of cream to prevent curdling, and half a teaspoonful of mustard, quarter of a saltspoonful of cayenne, half a teaspoonful of salt and a teaspoonful of Worcestershire sauce. Mix salt, pepper, mustard and Worcestershire sauce together, so that the pepper will not lump. In stirring begin from the bottom, gradually widening the circle of the spoon, and as soon as creamy serve.

An oyster rarebit is made by using the juice and soft parts of oysters cut up instead of beer, ale or milk.

A golden buck is a plain rarebit with two carefully poached eggs laid on top of cheese and toast.

A Yorkshire rarebit is a strip of broiled or fried bacon on top of the poached egg and rarebit.

THE SCIENCE OF EATING.

A Wise Woman Will Adapt Herself to New Conditions.

Life has been reduced to a system, says a writer in Womankind; we live and move and have our being by a set of rules immutable as the laws of the Medes and Persians, and woe betide that unfortunate wight who transgresses. Science has held its lamp aloft and thrown its rays of heavenly light into every corner of every department of the house of life, even into that corner of unscientific woman, the kitchen. And the light has revealed many strange and wonderful things, among others the fact that as a race we have known very little about the science of eating.

The preparation of food in a scientific way seems to be one of the most important branches of human knowledge, and yet it has only been during the past half

century that scientists have given the subject any attention whatever. Baron Liebig, in Germany, was a pioneer in this study, and in our own country Professor Atwater, an officer of the agricultural department, has done much to advance the science.

It is remarkable how far wrong some of our time honored traditions and ideas are shown to be under the investigations conducted by these scientists. For instance, housekeepers who have been for years priding themselves upon the snow white bread they baked were at first dismayed to learn that white bread is all a mistake, being not only deficient in important food elements, but being also positively detrimental to the health. Fortunately, however, the dismay of the housekeepers has been turned to joy by the discovery of a process of making whole wheat flour, by which all the gluten of the wheat—one of the most important of food elements—is retained. Whole wheat flour must not be confused with graham flour, which contains the husks or bran of the wheat that cause irritation of the digestive organs. The whole wheat flour is free from the bran, but it is claimed not a particle of the gluten is lost. It makes a bread of a rich, golden brown color, delicious to the taste, of easy digestion and of great nutritive value. Of course physicians and cooking schools recommend and urge the use of whole wheat flour, with the result that its use has spread rapidly, and soon every one will have ceased to regard the making of fine, snow white bread a special accomplishment.

This is only one of the many revolutions science is making in the kitchen. The wise woman is the one who adapts herself to new conditions and learns the economy of scientific living.

Fruit Shortcake.

You can quickly make a shortcake as follows: Sift a pint of flour, a heaping teaspoonful of baking powder and a pinch of salt together two times; add enough sweet milk to make a batter somewhat stiffer than for cake and a tablespoonful of melted (not hot) butter. Beat thoroughly, spread about three-fourths of an inch thick in a buttered round pie tin and bake 15 minutes in a quick oven. If strawberries are used and they are large, mash them lightly with a wooden spoon and sprinkle with sugar an hour before they are needed.

When the shortcake is baked, cut around the edges and pull it apart. Spread both halves with butter, cutting it in little bits and dropping it on, but not pressing it with a knife. Spread the bottom one with berries, lay the other over it, put a layer of berries on top, and over all sweetened whipped cream. Send to the table immediately and cut with a hot knife. Red raspberries, 1 part currants and 2 parts red raspberries, cherries, whortleberries, sliced peaches or warm stewed tart apples may be substituted for strawberries, and plain sweetened cream, or any sauce preferred, instead of whipped cream.

The chateleine pin gains in popularity and is devoted to useful as well as purely decorative pendants, such as a watch, purse, pencil, tablet, knife and scissors.

Pearl brooches are to be seen in the ever popular star design.

Long neck chains for lorgnettes are of gold set with pearls at intervals. Newer still are the chains with enameled ball or balls of finely chased gold.

The banquet ring continues to please with its embarrassment of gems and ornate design.

THE TRIUMPH OF LOVE

"HAPPY, FRUITFUL MARRIAGE." Every Man Who Would Know the Grand Truths, the Plain Facts, the New Discoveries of Medical Science as Applied to Married Life, Who Would Atone for Past Errors and Avoid Future Pitfalls, Should Secure the Wonderful Little Book Called "Complete Manhood, and How to Attain It."

"Here at last is information from a high medical source that must work wonders with this generation of men." The book fully describes a method by which to attain full vigor and manly power. A method by which to end all unnatural strains on the system.

CUPID AND PSYCHE.

To cure nervousness, lack of self-control, dependency, etc.
To dispense a faded and worn nature for one of brightness, buoyancy and power.
To cure forever effects of excesses, overwork, worry, etc.

To give full strength, development and tone to every portion and organ of the body.
Also no barrier. Failure impossible. Two thousand references.

The book is purely medical and scientific, useless to curiosity seekers, invaluable to men only who need vigor and manly power.

A despairing man, who had applied to us, soon after wrote:
"Well, I tell you that first day is one I'll never forget. I just bubbled with joy. I wanted to hug everybody and tell them my old self had died yesterday, and my new self was born to-day. Why didn't you tell me when I first wrote that I would find it this way?"

And another thus:
"If you dumped a cart load of gold at my feet it would not bring such gladness into my life as your method has done."

Write to the ELIXIR MEDICAL COMPANY, Buffalo, N.Y., and ask for the little book called "COMPLETE MANHOOD." Refer to this paper, and the company promises to send the book, in sealed envelope, without any marks, and entirely free, until it is well introduced.

Fruit, Fruit.

The Fruit season of 1896 is close at hand and I have perfected arrangements with some of the largest and most successful Fruit growers of the Ohio River hills to handle their entire crop of

Strawberries,
Raspberries,
Blackberries,
Peaches, Etc.

This fruit is grown on the elevated lands, principally in Lewis County, by growers of long experience, and will be much superior to any grown on the low or flat lands. It will be received by express and placed on the market here on the same day it is gathered, and will be furnished to dealers and consumers in first-class condition. Special prices always given to dealers, so as to enable them to sell at same prices I sell to consumers and make fair profits.

My Supply of Vegetables

will also be at all times full and of very best quality, and lowest prices.

A special invitation is extended country people to make my house their headquarters when in our city.

ANNOUNCEMENT.

FOR CONGRESS.

WE are authorized to announce W. LARUE THOMAS, of Mason County, a candidate for Congress from this, the Ninth, district, subject to the action of the Democratic party.

SUMMER FASHIONS.

AS SEEN IN THE NEW YORK SHOP WINDOWS.

Thin Fabrics Made Over Silk Are Extremely Popular—Wash Goods Are In Demand—White Linings and Trimmings a Conspicuous Feature—Dressy Capes.

With the approach of summer new modes assume increased importance in the world of fashion. Diaphanous materials are being more extensively employed than ever before. Over a silk foundation they appear to best advantage. Organdies, batistes and mulls are among leading fabrics. Dolly Varden mulls revive old memories as well as styles of long ago. In fact, thin gowns of grass linen and all sorts of wash fabrics are to the fore. For all round morning and afternoon wear gowns made of linen batiste are decidedly attractive.

The silk balayense is in use again, and many of the new summer gowns have the narrow pinked ruffle inside the skirt.

Ribbons of all widths, flowered, striped and plain, are a conspicuous feature of trimming on thin gowns this season. Bands of ribbon extend over the shoulders and down either side of the front of the skirt with bows at the end. Wider ribbons are used to face revers and form pointed epaulettes over the sleeves. Bows

GOWN OF CANVAS CLOTH AND SATIN.

of ribbon are on the shoulders, at the waist and neck, and fasten down the center of the shirt sleeve puffs with great effect. Especially new, too, are the wide gauze sash ribbons. White is as popular this season as over in dress decoration, white silk and satin being used for collars, vests, linings and facings on light and dark gowns alike, and almost every gown has a touch of white somewhere if it is a fashionable success. There is a lavish use of lace and all sorts of jeweled and spangled trimmings, and Persian embroideries of many soft colors woven together. Added to these is the universal use of chiffon.

Pique, white serge and duck gowns are usually made with a coat of some sort, which is worn over a shirt waist of silk or cotton. Linen canvas is also much used for these coat and skirt gowns.

A dressy gown in daffodil colored canvas cloth, embroidered with ecru lace and having sleeves, vest, waistband and underskirt of pale green satin, affords a model worthy of reproduction.

The newest dress sleeves reveal the contour of the arm, and puffs and bouffant effects are arranged with an eye to picturesqueness and almost any disposal of soft folds is regarded with favor. Cuffs to be en regle shall be modifications of the cavalier, gauntlet or bell variety. Developed in lace, velvet or ribbon, they unquestionably adorn the smart bodice of the summer girl, sometimes terminating at the elbow, at others framing the wrist—at all times an accessory of elegance.

Capes, so easy to carry and withal so becoming, have grown to be a favorite wrap for summer. Fascinating and coquettish as these capes are, they are easily made and from all kinds of mate-

A FRENCH CAPE.

rials. Changeable silk, figured or plain, with accordion plaited ruffle around the edge, a jabot and ruche of the silk, is the material used in some of the most stylish models. Others are composed of delicate chiffons. A charming French model is a combination of glace silk and accordion plaited chiffon. Many of the jaunty shoulder coverings have a large ruche about the neck, with a jabot of crape or chiffon. Neck ruches are now substituted for high collars, and the variety displayed in the shops is endless.

SPECIAL FOR MAY

THE BEE HIVE!

CARPETS

We are very busy in our Carpet rooms. These prices tell the story:

50c. Brussels at 39c.
75c. Brussels at 50c.
\$1 Velvets at 69c.
50c. Ingrains at 39c.
40c. Ingrains at 29c.
Matings at 10, 12, 15c. up to the very finest.

Full line of Rugs in Smyrna, Moquette and Jap, and China Rugs. Get our prices.

One hundred pieces new lawns, dimity and wash dress goods just received. These include all the new linen effects. See window display.

WITCH KLOTH.—A new supply of witch kloth. Greatest invention of the age, 15c. See it. Sole selling agents Ferris Good Sense Corset Waists and Onyx Hosiery.

LACE CURTAINS.

We commence our line of Curtains with a full three-yard, good full width, cheap at \$1.00, our price 69c.; \$1.25 grade, 89c.; \$1.50 grade, \$1.

SPECIAL.—One hundred pairs three and a half yard good sixty inch wide, would be cheap at \$3, special price \$1.69.

Full line door and Sash Curtains and Draperies.

Don't forget that we sell Window Shades.

Laundried SHIRT WAISTS

We show over one hundred patterns in Ladies' Laundried Shirt Waists. If you want to have a perfect fit and stylish waist, get one of our

National Brand Waists.

They are the proper thing. Now is the time to buy. Thirty styles at 50c.; fifty styles at \$1,—all with the new Bishop sleeves. New line of Belts just in.

Some are made of alternate double strips of black and white tulle several inches broad and plaited very full in the center. Bows of black satin ribbon are added at the back or sides and fasten in front. Black and colored net, embroidered with cream lace, is also used, and very stylish ruches are made of black chiffon with a satin edge gathered to a ribbon band.

ALICE VARNUM.

City of Mexico Signs.

Speaking of the City of Mexico, a correspondent of the Detroit Journal says: "There are few signs with firm names on them, but each shop has a distinctive title of its own, some of them grotesquely out of place. A dark little tobacco shop rejoices in a big sign over the doorway that informs the passer that this is the 'Pearl of the Antilles.' A shop where cheese is sold is called the 'Sacred Heart of Jesus.' A zapateria, or shoe store, bears the name of 'The Lamp of Aladdin.' Others were the 'Gate of Paradise,' the 'Grand House of Gold,' the 'Garden of Eden,' the 'Fifth of May,' etc. In most of them the shelves and counters are crowded in the front part of the room, and the goods are displayed so the purchaser may see without bothering the clerk to hand them down. Doors and windows are closed at night with heavy wooden shutters, but in the daytime the fronts are wide open to the streets."

Real Fire Is Invisible.

No eye, says a scientific writer, has ever seen real fire. The flame is leaping in strange, fantastic form, 15 or 20 inches upward from the coal, and with it is a good deal of black, sooty smoke. The sooty smoke and the flames are one and the same, with only a difference of temperature. The soot which forms the flame is redhot. Every particle of the flame is redhot coal or a particle of the carbon. The real fire we do not see. The instant that the carbon atoms become really burned, eaten up by the oxygen of combustion, they are invisible. In burning 3 pounds of carbon, the heated state of which gives us flame, the fire work is done by 8 pounds of oxygen. The oxygen we do not see. The carbon we only see just before it is burned.

A Household Treasure.

D. W. Fuller, of Canajoharie, N. Y., says that he always keeps Dr. King's New Discovery in the house and his family has always found the very best results follow its use; that he would not be without it, if procurable. G. A. Dykeman, druggist, Catskill, N. Y., says that Dr. King's New Discovery is undoubtedly the best Cough remedy; that he has used it in his family for eight years, and it has never failed to do all that is claimed for it. Why not try a remedy so long tried and tested? Trial bottles free at J. James Wood's drug store. Regular size 50c and \$1.

For a Fair Athlete.

Lovers of outdoor sports have discovered that freedom of action is out of the question with tight seams and whalebones. The New York Herald de-

COMFORTABLE AND BECOMING.

picts a handsome jersey of white, with smocked yokes, through which light blue, pink or green is visible. Other styles are seen in solid colors or trimmed in white and dark red or blue and are serviceable. These are indispensable for women who intend to ride a wheel or play golf.

To Preserve Flowers.

Professor Pfützer in The Journal of the Austrian Pharmaceutical society gives the following method for preserving flowers so that they retain their natural color and shape. We quote an abstract from The National Druggist: "Moisten 1,000 parts of fine white sand that has been previously well washed and thoroughly dried and sifted with a solution consisting of three parts of stearin, 3 parts of paraffin, 3 parts of salicylic acid and 100 parts of alcohol. Work the sand up thoroughly, so that every grain of it is impregnated with the mixture, and then spread it out and let it become perfectly dry. To use, place the flowers in a suitable box, the bottom of which has been covered with a portion of the prepared sand, and then dust the latter over them until all the interstices have been completely filled with it. Close the box tightly, and put in a place where it can be maintained at a temperature of from 30 to 40 degrees C. for two or three days. At the expiration of this time remove the box and let the sand escape. The flowers can then be put into suitable receptacles or glass cases without fear of deterioration. Flowers that have become wilted should have their color freshened up by dipping into a suitable aniline solution."

In putting away winter clothing, whether it be in the form of personal apparel or household furnishings, such as heavy curtains or bedding, it is necessary for one to exercise the utmost care in order to guard against great loss from the ravages of moths. No trouble, no matter how laborious, should be spared, there being much at stake and the consequences being quite too serious to be trifled with in the very least. Heavy curtains, which are used only in the winter time as a protection, and all superfluous bedding, such as blankets and quilts, should be exposed to the sun and air for a few hours, the curtains being well beaten and freed from all dust and the blankets carefully washed. Then they should be neatly folded, wrapped in large cotton sheets and laid away in the linen press or storeroom, upon substantial shelves, which are clean and dry, accompanied by a goodly supply of camphor.—Good Housekeeping.

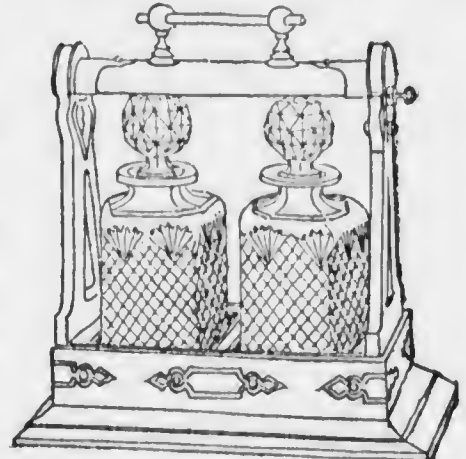

MODERN CUT GLASS.

AMERICAN CUT GLASS THE FINEST IN THE WORLD.

Its Popularity Is Demonstrated In a Profusion of Articles Decorative and Useful. Flower Bowls and Vases—Odd Bits Especially Prized by Up to Date Housewives.

Cut glass was formerly for the few. Since its manufacture has been greatly extended in this country, it is now within the reach of a greater number. In common use the pressed and the blown glass take no mean place among the products of science. They are now made so delicate, clear and sparkling that the better specimens are not to be lightly esteemed. Among them are these thin tumblers that by the sand blast process of engraving are decorated with a multitude of designs, such as arabesques, flowers and monograms.

A visit to any of the large glass establishments in our cities will convince the most conservative person that American cut glass is the finest in the world. The first thing to catch the eye are lovely rose bowls that, while transparently showing the stems of blossoms, enhance their brilliance by their iridescence. They are spherical in form, with tren-

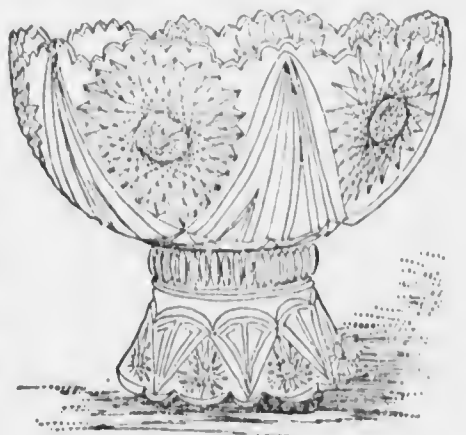

A LOCKED LIQUOR SET.

coated poles, so that while standing with broad bases, so as to be not readily overturned, they can receive a large handful of spreading sprays. These bowls are, in fact, desirable for almost every flower that grows. The tall vases are equally appropriate and elegant and range from 15 to 18 inches high.

Turning from these accessories to articles of table use, we learn that the individual salts are not wholly banished from the good graces of some families. Beside them are knife rests, mustard cups, with silver tops, of a variety of sizes, and bottles into which is poured Worcestershire sauce from the unsightly receptacles in which it comes from the market. There are also oyster sets—holding pepper, salt, mustard and sauce—and cruet sets not yet banished on account of their convenience. Coming to compote and berry dishes, we find an array long and bewildering. There are numberless bowls suited alike to ice cream, salads, berries and punch, which will be appreciated by housewives with modest incomes. This same class will also prize the locked liquor sets with polished wood frame and cut glass bottles. These cases are open, showing the rich cuttings, yet so made that they can be locked at one end, thus being safe from light fingers. A writer in The Decorator and Furnisher, who calls attention to the foregoing, along with numerous other articles decorated and useful in cut glass and crystal, says:

To show cut glass at its best there should be provided in the dining room a corner cabinet, with many shelves and

CUT GLASS BOWL.

glass doors. Back of the shelving should be felt or plush of some dark, rich coloring that harmonizes with the other furnishings, such as ruby or plum. Arranged on these shelves, with the smaller pieces in front, these fine accessories of the table are always in evidence.

To show the brilliance of their facets requires much attention. Cut glass should be washed in warm suds with a brush, moderately stiff, but not harsh. With it every crevice must be entered, since dust mars its peculiar iridescence. It may be rinsed in warm water, and then, if the pieces are not too large, plunged into sawdust to dry. Then brush again with a dry, soft whisk and you have the facets sparkling like the diamonds they so much resemble. Where the sawdust is not practicable, wipe the articles with tissue paper until every particle of moisture is absorbed. This is almost as good as to use the sawdust.

The Sword Design.

The sword still affords a popular design for hairpins and corsage ornaments. The hilt is set with diamonds, or other gems; there is a small sheath similarly set, which is readjusted by a spring after the pin has been run through the dress or the hair.

The hairpins are brilliant affairs with their balls of filigree gold or silver gilt set round with small gems and surmounted with a large colored stone, such as a topaz, amethyst or garnet.

BIG CUT IN SHOES

FOR CASH ONLY

On SATURDAY, MAY 9th, We Begin a Cut-Price Sale

ON ALL SHOES IN OUR HOUSE. LOOK, AND YOU WILL NOT BE DISAPPOINTED. EVERY PAIR OF SHOES WILL BE SOLD AT REDUCED PRICES.

We Mention Only a Few of the Rare Bargains:

One thousand pairs Women's Dongola Button Shoes, made to sell from \$2 to \$5 per pair, sizes 1 to 3, in this sale \$1, \$1.25 and \$1.50.

Five hundred pairs Women's Dongola Oxfords, sizes 1 to 3, made to sell for \$1.25 to \$3, in this sale 50, 75, \$1 and \$1.25.

Three hundred pairs Men's High-grade Shoes, all sizes, made to sell for \$2.50 to \$6, in this sale \$1.50 to \$3.50.

Fifty pairs Women's Tan Polish, sizes 1 to 3, made to sell for \$3.50, in this sale \$1.25.

A good line of Men's, Boys' and Children's Tan Shoes at prices that will interest you.

PERSONS OWING ACCOUNTS.—I must insist on them being paid, as longer indulgence will not be given.

H. C. BARKLEY & CO.

WASHINGTON LETTER.

Army and Navy Retirements—Some Foreigners Ignorant Concerning America—Postal Clerks.

[Special Correspondence.]

Retirements from the active lists of the army and navy are on the increase, for vacancies must be created for the cadets from the academies. But these retirements cost a sturdy sum. For every brigadier general added to the retired list a salary of \$343.75 must be allowed; for a colonel, the retired list salary is \$218.75 to \$281.25 a month, according to length of service; for a lieutenant colonel, the salary is \$187.50 to \$250; for a major, \$156.25 to \$218.75; for a captain, from \$112.50 to \$175; for a lieutenant, from \$93.75 to \$140; for a chaplain, from \$112.50 to \$157.50. Of course these salaries are less than the salaries which the officers drew when on the active list, but their active salaries do not cease. For every officer retired there is promotion all along the line, and a new second lieutenant is created. The place made vacant is filled, and the salary list of the active branch of the army remains the same in the aggregate.

The list of retirements for one year includes 4 brigadier generals, 11 colonels, 3 lieutenant colonels, 14 majors, 17 captains, 1 lieutenant and 1 chaplain. Their aggregate salaries range from \$8,650 to \$11,503.75 each month—that is, striking an average of service, these men are drawing probably \$120,000 a year from the public treasury. At the same time some other men are drawing the salaries which they drew on the active list.

Congressman McCreary of Kentucky tells some amusing stories of his experiences as a member of the international monetary conference held in Brussels some time ago. "Although the foreign members of that conference were very intelligent men," said Mr. McCreary, "it was amazing how little they knew about the United States. One evening I was sitting in a group of six delegates, each representing a different country. The conversation turned on railways and railway building, and the delegates were expatiating upon the fine transportation systems of their countries. Finally one of them turned to me and said: 'I suppose you are not much interested in this subject, sir. Your country being young, you cannot as yet have had much experience in these matters. Yet I suppose the day will come when you will begin building railways in the United States.' I was so surprised that at first I did not know how to answer him. I looked around at the other members of the group, expecting to see them smiling. I supposed of course that the gentleman was joking with me, but when I saw nothing but serious expressions in the faces of the others and no suspicious glint in the eyes of the gentleman who had spoken, I was forced to accept the remark as an earnest one and reply accordingly.

"I was listening to your conversation with much pleasure," I then said, "and remained silent only because I did not wish to appear boastful or self glorifying. Perhaps it is proper I should explain to you that we have in the United States the greatest railway systems in the world. We have by far the finest equipments for traveling." I then described our system of sleeping and parlor cars, our through trains, our dining cars, the accommodations which all our roads furnish, even for the cheapest sort of travelers. By this time the gentlemen began to open their eyes in astonishment. They seemed so eager to learn more about our railroads that I launched into some figures. "Take your own country," said I to the gentleman who had first spoken, "and who was from Switzerland. 'You have no more than 5,000 miles of road in your borders. Take the greatest countries of Europe—Great Britain, France and Germany—and none of them has more than 30,000 miles of railway, while the United States has 173,000 miles.' This was a stunner. My friends could scarcely believe their ears or my veracity. Noting the look of incredulity upon their faces, I begged them to step into the library and select some standard statistical work likely to contain the information. They did so, and of course discovered that I was right. Intelligent and well informed as these men were on other topics, they were woefully ignorant concerning America."

Postal Clerks and Appropriations.

The postal clerks of the country are the poorest paid and hardest worked of any employees in the public service. Nor are they now paid in accordance with any fixed rule. The law simply provides the minimum rates and the maximum rates, and salaries which the men receive depend in very large measure upon the caprice of individual postmasters. An attempt to remedy this state of affairs was made by the passage of the so called classification act of 1880, but it made no material change in the prevailing system. But Congressmen Sperry's bill will remedy all this if it passes.

It proposes to classify and pay the clerks according to the work they actually perform. In this bill the designations are defined, the duties are determined and the salaries are fixed. The bill makes no large increases in salaries, and its principal advantage to the postal employees will be in that it will make their salaries certain and uniform.

It will operate, however, to increase the pay of a large number of postal clerks who, under the present system, are improperly classified and paid, and

while the increase will be small in individual instances, it will amount to a considerable sum in the aggregate. The bill itself carries no appropriation, and it could be put into operation without an immediate appropriation, but if this was done it would require a deficiency appropriation in the next session of congress.

CARL SCHOFIELD.

The keynote to successful hairdressing is to follow only in the distance and with many ramifications the prevailing fashion. If that capricious dame announces that "hair is worn low this season," it means simply to the woman who knows that the general effect of her coiffure is to be slightly lowered. She will still dress her hair, as she must always, to suit her face. A writer in the New York Times says a low, straight forehead may be surmounted by a pompadour arrangement; a high pointed brow never. Fine, straight black hair ought never to show itself in frizzes or fine curls; loose, shining waves are its heightening beauty. It is a curious fact, too, that blond and brown hair may permit itself a sweet confusion that in black hair is simple untidiness.

Innovation In Visiting Cards.

The effort is being made to introduce the fashion of having names on calling cards engraved in Roman letters. This is more expensive than the usual script, but these Roman letters suggest at first glance common printing. The assurance is given, however, that the swells use thin cards embellished with the name in small Roman capitals.

A Very Peculiar Accident.

WARREN, Ind., May 16.—A peculiar accident befell Alva Denny, living near North Mauchester, this county, on Wednesday. He was riding a valuable 4-year-old horse, which became unmanageable, and Denny, who was carrying a sharp ax, became alarmed and threw the ax to the roadside. It struck a stump, and, bounding back, the edge struck the horse's fore leg, just above the hoof, and severed the limb, so that it hung by a shred of hide. A veterinary surgeon ordered the animal killed.

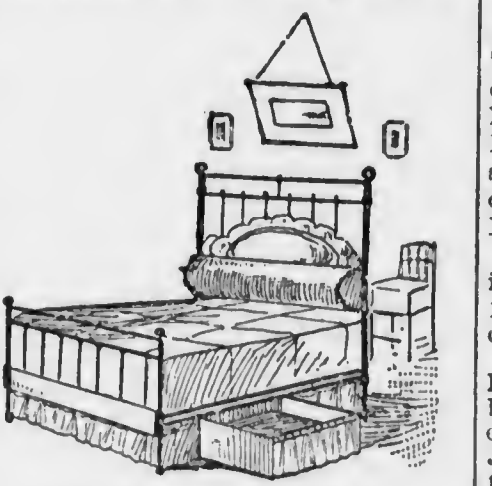

A Mad Dog Seize.

WICHITA, Kan., May 16.—The decision made by council of Wichita physicians that a dog that bit several people here last week was affected with rabies has caused widespread consternation. Dogs are being shot by the wholesale, and several of the victims will go to Chicago to take the Pasteur treatment. None of the people bitten by the dog have developed symptoms of hydrophobia, however.

FURNISHING NOTES.

Applying More Particularly to Bedrooms and Rooms in Country Houses.

The possibilities of green seem to be tried to the uttermost this season. We have green carpets galore, green matings in much variety and green furniture. A novelty in the latter is green oak—that is to say, light oak which has been stained a rich, moss green color.

DRESS DRAWER FOR SMALL ROOMS.

With coverings of pretty cretonne in harmonious tones it gives a delightful look to a room in a country house.

A very remarkable carpet in the green of a lightly shaded rippling stream of watered grounding has the border in a design of dense garland of the white water lily laid on a growth of the cat-tail. Very attractive also are carpets of plain groundings in green, with flower borders of paler tones. For dainty bedrooms soft colors in general find favor, and few carpets are more attractive and fashionable than a delicate rose or blue with tiny daisies or forget-me-nots scattered over it.

Matings at this season are certainly a boon to the economically minded or scant of purse. "Cheap, pretty and good" appears to express the present status of some lines of them at least. It is quite possible to have a floor covering of this sort that will harmonize beautifully with woodwork and walls, being no longer confined to the crude colorings that originally marked the cheaper matings. Then there are improvements in the weaving and the making of the edges which add to the wearing qualities.

An addition to the comfort of a bedroom, especially a small one, has been designed in an ingenious arrangement termed a dress drawer. This drawer, which is tight and dustproof, is to be fixed under the bed in such a way that it can be easily drawn out, and affords accommodation for dress skirts, etc., for which the restricted size of the room may not allow sufficient wardrobe space. The drawer offers much needed and welcome storage space without still further crowding up a perhaps already full room, and is an idea which the handy man in the small home should consider.

Nightingale Drops Dead.

LOUISVILLE, May 16.—Hamlin's Nightingale dropped dead at the course of the Louisville Fair and Driving association while being jogged yesterday. Her value was over \$10,000.

PRESIDENTIAL PROMOTIONS.

Important Changes Made in the Pension Department.

WASHINGTON, May 16.—The president has sent to the senate the following nominations:

Justice—William Lochren of Minnesota to be United States district judge for the district of Minnesota, vice Rensselaer R. Nelson, resigned.

Interior—Dominic I. Murphy of Pennsylvania now first deputy commissioner of pensions, to be commissioner of pensions, vice William Lochren, resigned; Napoleon J. T. Dana of New Hampshire, to be first deputy commissioner of pensions, vice Dominic I. Murphy, nominated for commissioner of pensions.

JUDGE WILLIAM LOCHREN.

Judge Lochren, who is nominated for United States district judge of Minnesota to succeed Rensselaer Nelson, was appointed commissioner of pensions at the beginning of the present administration. He was then a district judge in Minnesota. Judge Nelson, whom he succeeds, was appointed in 1853 by President Buchanan, and was the longest in service of any judge in the United States courts. Ever since Judge Lochren's appointment as commissioner of pensions it has been the desire of his friends to promote him to the bench in case Judge Nelson would resign. It has been known that his preference has been for the bench rather than an executive position. Leading lawyers in Minnesota have petitioned for his appointment as United States judge. Mr. Lochren was endorsed by the Minnesota legislature unanimously for the position he now holds.

The successor of Judge Lochren, Mr. Murphy, was chief clerk of the pension office during the first administration of President Cleveland. To him has been largely entrusted the details in the office and much of the executive management. He was first deputy before Judge Lochren was appointed, and was active in the reorganization of the office.

The appointment of General Dana was a promotion. He is now chief of division in the office. He is a graduate of West Point, and obtained the rank of general in the volunteer service. He is now on the retired list of the army with the rank of lieutenant.

UNEXPECTED SUMMONS.

Sudden Death of Rear Admiral Thomas H. Stevens, U. S. N., Retired.

WASHINGTON, May 16.—Rear Admiral Thomas H. Stevens, U. S. N., retired, died unexpectedly at the residence of his son-in-law, Robert Bradley, in Rockville, Md., yesterday. He was a son of Captain Thomas Holdup Stevens, one of the heroes of the battle of Lake Erie, and had a brilliant war record.

He was born in Middletown, Conn., in 1819, was appointed midshipman in 1836 and in 1842 served as aid to President Tyler. In the civil war he commanded the leading vessel in the combined attack of land and naval forces on Fort Clinch, commanded the expedition up the St. James river and on the steamer Maratona led the first expedition to Cumberland to open the James. He also commanded the Monitor and Patapsco, and with that ironclad performed gallant services in the engagements with the forts in Charleston harbor. He had a severe engagement with the batteries on Sullivan's island in 1863, and led a boat attack on Fort Sumter.

He afterward commanded the Oneida of the Western Gulf blockading squadron, but was temporarily transferred to the ironclad Winnebago for the operations before Mobile in 1864 and was again conspicuous for the masterly manner in which he handled his vessel and his dazzling personal daring. He was made a captain in July, 1866; a commodore in November, 1872, and was commissioned a rear admiral Oct. 27, 1879. In this capacity he commanded the Pacific fleet. He was retired May 27, 1881.

Admiral Stevens leaves three sons, one of them Lieutenant Stevens, of the navy, and a daughter.

M'KINLEY AND FREE SILVER.

Wyoming Republicans Finally Agree on a Candidate and Platform.

SHERIDAN, Wyo., May 16.—McKinley and free silver were declared inseparable political twins by the Republican state convention yesterday. The committee on resolutions had a warm session. The platform as finally arranged is intended to meet the wants of all factions, and therefore satisfying none. The delegation to St. Louis is composed of William Vandeventer, P. B. Brooks, B. F. Fowler, Otto Gramm, J. C. Davis and C. C. Hamlin. The delegates were instructed to support Chairman Vandeventer for a place on the national committee, and William McKinley for president.

The financial plank in full is as follows: "We reaffirm allegiance to the principles of bimetalism as enunciated in the Republican state platform accepted at Casper in 1894; we commend the record of our senators and representatives in congress in maintaining these principles and we instruct our delegates to the St. Louis convention to take like action when the financial plank of the platform of their convention is being made."

A Round Silo.

A round silo situated in the haymow of a barn similar to the diagram was visited the past winter and reported up.

There are about three of them, the first one 3 feet from the bottom and the rest about 4 feet apart. It will be noticed that the rest of the mow can be utilized, and that there is virtually no lost space, since the triangle at A is needed for throwing out the material. A silo 14 feet in diameter and 24 feet high would contain, allowing that it had settled one quarter, about 2,700 cubic feet.

In examining the silo referred to it was noticed that the staves were entirely dry on the outside, and it was the opinion of all who were present that this method of construction would do away entirely with dry rot, which is so destructive to thick walled silos.

SPAIN AND THE UNITED STATES.

Minister De Lome Says That No Friction Exists Between Them.

WASHINGTON, May 16.—The Spanish minister, Mr. Dupuy de Lome, being shown a newspaper dispatch from Madrid, asserting that the Spanish government had authorized a formal remonstrance to be presented against the attitude of the United States in regard to Cuba, replied that this was directly contrary to all his information and to the explicit statements contained in the queen's speech.

He said his government had warned him to pay no attention to disturbing dispatches in the press as they would keep him fully advised on all points. The relations between Spain and the United States, he added, were entirely cordial and there was no friction of any kind.

Gladness Comes

With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

ALL WE ASK

Is a comparison. Your money back if goods are not satisfactory. The BLUE RIBBON STORE, corner of Third and Limestone. You will find us handing out the very best quality of goods at prices that no other concern in the city can duplicate.

We have made arrangements to handle STRAWBERRIES for parties in Greenup County who cultivate 50 acres, which will enable us to furnish all Maysville and vicinity with the finest Berries that come to this market, both at wholesale and retail.

CUMMINS & REDMOND.

Traxel
